TOTAL WAR EFFORT OF SCHOOLS

(From the beginning of the War until June 1942)

The generous response of Ontario school pupils toward the general war effort is set forth below. This donation is quite apart from their participation in various municipal contributions toward the same end.

	Elementary Schools	Secondary Schools	Total
CASH DONATIONS			
1. Red Cross (including Junior Red Cross).....	\$ 165,959	\$ 68,319	\$ 234,278
2. War Savings (Stamps, Certificates and Victory Bonds).....	2,201,150	948,481	3,149,631
3. Purchase of Equipment.....	19,405	24,626	44,031
4. Purchase of Clothing, Medical Supplies, etc. (ready made or for processing).....	18,407	25,236	43,643
5. Donations for special funds: (B.W.V.F., Queen's Fund, etc.)	161,101	69,293	230,394
6. Any other purchases or donations of money.....	47,429	24,024	71,453
Total.....	<u>\$2,613,451</u>	<u>\$1,159,979</u>	<u>\$3,773,430</u>

NON-CASH DONATIONS

1. Clothing donated or made (number of articles).....	125,581	114,081	239,662
2. Food donated (estimated money value).....	\$8,828	\$13,890	\$22,718
3. Salvage collected and turned in—not sold (weight in tons).....	3,642	1,082	4,724
4. Any other donations (estimated money value).....	<u>\$28,506</u>	<u>\$21,923</u>	<u>\$50,429</u>

Equipment Purchased* included:

7 ambulances	1 Utility car	1 bed endowed at Taplow
10 mobile canteens	2 machine guns	Military Hospital
3 Red Cross wagons	1 water purifier	1 Motion-picture projection machine

*These are the larger items included in Cash Donations No. 3.

REPORT

OF THE

Minister of Education

FOR THE YEAR 1941

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

YOUR HONOUR,—

I beg leave to present to your Honour the Report of the Department of Education for the year 1941.

In presenting a report of the activities of the Department of Education during the year 1941, it may not be inappropriate to direct special attention to the results of the impact on the educational system of the Province of conditions growing out of the prosecution of the war. These influences are many and may be expected to operate with intensified force as the war progresses.

Reference may be made incidentally to the transfer to the Department of National Defence of two groups of buildings long associated with the history of education in this Province. Since July, 1941, the Toronto Normal-Model School has been used as an R.C.A.F. training station and the buildings and grounds of the Ontario School for the Deaf, immediately to the west of the City of Belleville, have been employed by the R.C.A.F. for the purposes of No. 5 Initial Training School. The closing of the Model School involved a break with a long and honourable tradition and naturally brought keen regrets to the hearts of many hundreds of its former students. Through the co-operation of the Board of Education of the City of Toronto, satisfactory accommodation was found for the Normal School in the Earl Kitchener Public School on Pape Avenue, in the eastern section of the City of Toronto. More serious difficulties were encountered in providing a new home for the School for the Deaf. Ultimately, buildings were obtained in the City of Belleville, including the Parish Hall of St. Thomas' Anglican Church, which have provided classrooms, dormitories and dining-rooms. Changes of this nature cannot be made, however, without a serious disturbance in the work of the School. To adjust the work of the School to its limited accommodation, it has been found necessary to limit admission to the classes at Belleville to pupils under sixteen years of age and to open day classes in the Cities of Toronto, Hamilton, London and Windsor. Pupils between five and sixteen are admitted to these classes and, in Toronto, Hamilton and London, pupils also between sixteen and twenty-one.

As might be expected, one of the immediate effects of the war was a decline in attendance at our schools. While both Elementary and Secondary Schools reflect this trend, it was more pronounced in the Secondary Schools, where the influence of war conditions was more effective. The decline in attendance in Public and Separate Schools was 9,409; while that in all types of Secondary

Schools, including Night Classes in Vocational Schools, was 14,510. This can be attributed in part to enlistments in the armed forces, but, in the main, to the new opportunities for profitable employment offered to senior boys and girls by various industries associated with the Nation's war effort.

The age up to which attendance at school is compulsory in this Province has been fixed by law at sixteen years. This requirement is subject to the condition that, in times of urgent need, a local Attendance Officer may issue a certificate permitting a pupil to leave school before attaining the age of sixteen. From time to time, representations have been made requesting the reduction of the age of compulsory attendance from sixteen to fifteen, or even fourteen years. That such a reduction is not necessary, if the present law is administered with a sympathetic understanding of local conditions, was demonstrated this year. The number of Employment Certificates issued by Attendance Officers increased from 1,907 in the year 1938 to 4,871 in 1940, thus demonstrating the adaptability of the present law to changing conditions.

A somewhat kindred movement in the attendance at the Provincial Normal Schools has been manifest. The total attendance declined from 1,247 in the session 1939-40 to 1,131 in 1940-41 and to 1,112 in 1941-42. It will thus be seen that this movement began before the outbreak of the war and cannot be attributed entirely to conditions produced by the war. That it will be aggravated by the war, is a certainty, both because of enlistments in the armed forces and because of the attraction of the higher salaries which will be paid both to men and women in the various enterprises associated with war production. There are limits beyond which the Department will not be justified in going in lowering the standards required for admission to the teaching profession. There must be such an increase in teachers' salaries throughout the Province as will enable the teacher to maintain that measure of freedom and independence essential to the performance of the duties expected of the teaching profession.

It is encouraging to observe that there is a very definite trend in the direction of the payment of higher salaries to teachers. In the year 1940-41, there was an increase in the average salary paid to all male Public School teachers of \$48, to male assistants of \$70 and to women teachers of \$32, as compared with the year 1938-39. The average salary of male teachers in rural Public Schools increased \$93 and that of women teachers \$63 over the average paid in 1940-41. The predominating rural salary rose from \$700 in 1940-41 to \$800 in 1941-42.

The amount paid by the Province in the form of general legislative grants to public and Separate Schools in 1941, namely, \$4,706,554.84, was the largest sum apportioned to these schools in any one year in the history of the Province. The regulations, approved by Order-in-Council, which contain the conditions determining the amount of the grant payable to each school, take into account the need of the local community for assistance, as determined by the assessment per pupil of average attendance, and by the ratio of teachers' salaries to the equalized assessment. In rural schools and in villages and towns under 2,000 population, the legislative grant is \$4.25 per pupil, where the assessment is between \$2,500 and \$3,000 per pupil, \$4.75 where it is between \$2,000 and \$2,500, and the maximum of \$5 per pupil where it is under \$2,000. The reports for the year 1941 show that 978 schools throughout the Province were entitled to the maximum grant of \$5 per pupil. Of these, 54 were in urban centres.

The grant based on teachers' salaries indicates, likewise, the extent of the aid being given to poor school sections. In 602 rural school sections, the teacher's

salary represented 40 mills or more of the equalized assessment. In these sections, the legislative grant included an amount which was the equivalent of from 60 per cent to 77 per cent of the salary paid to the school teacher.

The movement in the direction of forming larger school areas has continued throughout the period of the war. In 1941, the number was increased by 31, with the result that at the end of that year there were in all 130 township school areas replacing 666 small school sections.

It is possible that the scarcity of teachers may have encouraged certain school boards, in cases where the attendance was small, to close their schools temporarily and arrange for the instruction of their pupils in neighbouring schools. Where the attendance has been very small, this has been found to be not only economical but sound educational procedure. Should a change in conditions in a school section warrant the re-opening of the school, no objection can be taken to such re-opening. During the year 1941, 78 schools were closed temporarily, while one was re-opened.

The records of the medical examination of young men applying for admission to the armed forces suggest that advantage is not being taken of the powers enjoyed by local school and health authorities to provide a medical inspection service in the schools. Authority has now been granted to county councils to engage public health nurses, who may maintain a school health service at the expense of the county. There would seem to be a need for the further education of the public in the advantages of such services and, possibly, a larger measure of financial support from the State in the initial stages of their development.

Two phases of the influence of the war on the work of the High Schools and Collegiate Institutes deserve mention. The length of the teaching year was reduced for many pupils, both at the end of the term in May and June and at the beginning of the autumn term in September. Arrangements were made by which pupils were permitted to leave school to work on the farm, or in essential war industries. This shortening of the teaching year placed an additional burden of responsibility on our teachers in that it required them to cover the prescribed work in a shorter period of time. It is to their abiding credit that the teachers willingly assumed this further responsibility, thereby contributing most effectively to the production of essential food materials in this Province.

The pupils of our Secondary Schools were given the opportunity of participating more directly in the Nation's war effort. Most schools took an active part in the various salvage campaigns. Many of them provided large quantities of books and magazines which were distributed through one or other of the War Service organizations. Especially, however, did our Secondary Schools distinguish themselves in the collection of money by the sale of War Certificates and in the provision both of money and of clothing and other materials for the Red Cross. It has been estimated that through the efforts of our Secondary School pupils a contribution of not less than a million dollars was made to the Nation's war effort. Of even greater importance has been the realization by our youth that they, too, are partners in the prosecution of the war and that they have their responsibilities in maintaining a wholesome life in the community.

In no branch of our educational system has the impact of war conditions been felt more extensively than in our Technical and Vocational Schools. Special War Emergency Classes were introduced during the summer of 1940 for the purpose of training skilled and semi-skilled workers for war industries and for the

armed forces. By an agreement between the Federal and Provincial Governments, the Province assumed the cost of administration and 50 per cent of the cost of essential special equipment. The Dominion Government undertook to pay the remaining 50 per cent of the cost of equipment, as well as teachers' salaries, supplies and a subsistence allowance to trainees. Supervision of the training is vested in an Inter-departmental Committee representing the Departments of Education and of Labour.

Training has been provided in virtually every craft represented in the production of war materials and in the special techniques required by the various services. Special reference may be warranted to the training of radio technicians, tool makers and instrument makers. Classes have been provided for the training of women for industry; in cooking, for both men and women in army services; and in commercial courses to provide both men and women for clerical positions in the Federal Civil Service and in the Army and Air Force.

The extent of the contributions made by our Technical Schools may be judged by the fact that from the introduction of the programme in July, 1940, to the end of June, 1941, of a total of 41,758 men and women trained in the entire Dominion, 25,616 were trained in the Vocational Schools of this Province, and that of a total of 18,920 members of the armed forces who received special instruction as artificers and technicians, 6,450 were, likewise, trained in our Vocational Schools.

This most creditable achievement has been made possible by reason of two conditions,—the whole-hearted co-operation of local school boards, and the devotion and self-sacrifice of the members of the teaching staffs of our schools. The accommodation and equipment of our local school boards were placed at the disposal of the Government without reservation. The entire organization of the school was made subordinate to the successful conduct of the War Emergency Classes. In not a few instances, the work of the school was adjusted to the needs of a 24 hour day. Too much praise, however, cannot be given to the shop directors and their assistants, whose wisdom and experience provided sound guidance and whose tireless energy enabled them to solve new and difficult problems as they arose. Their achievement will come to be regarded as one of the most valuable contributions made by the Canadian people to the prosecution of the war.

Respectfully submitted,

D. McARTHUR,

Minister of Education.

Toronto, November 16th, 1942.

APPENDIX A

REPORT OF THE CHIEF INSPECTOR OF PUBLIC AND SEPARATE SCHOOLS

The Provincial Inspectoral Staff, 1941

I. IN MEMORIAM:

Mr. James Froats, M.A., B.Paed. (Queens), Public School Inspector for Stormont County, died suddenly at his home in Finch on Friday, April 4th, 1941. Mr. Froats was born at Hoasic, in Williamsburg Township, Dundas County, in 1872, the son of United Empire Loyalist parents. He received his elementary education in S.S. No. 22 Williamsburg and his secondary education in the Morrisburg Collegiate Institute. His professional training as a teacher was obtained at the Morrisburg Model School, the Ottawa Normal School and the School of Pedagogy in Toronto.

The son of a very successful Ontario teacher, Mr. Froats was by natural aptitude, as well as by professional training, a teacher. In schools at Goldfield, Maple Ridge, Lunenburg, Morewood, Cornwall and Finch Mr. Froats gave excellent service. His appointment as a teacher and principal was in the Finch Public and Continuation School, in Stormont County. His success here made him the natural appointee by the Counties' Council to the public school inspectorate of Stormont County, in 1909 in which position he remained until the time of his death. Many teachers whose work was supervised by Mr. Froats regarded him as a true friend, and as one who was an expert in assisting teachers to improve their classroom practice. He received at all times the esteem and co-operation of parents, trustees and ratepayers. During this thirty-two years' service as a public school inspector he saw many improvements made in the schools of the county.

II. RETIREMENTS:

Mr. George A. Carefoot, B.A., B.Paed. (Queens), Public School Inspector for Lincoln County, retired on August 31st, 1941, after twenty-five years of very successful service in this capacity. Mr. Carefoot was born in 1870 at Red Wing, Collingwood Township, Grey County. He received his elementary school instruction in S.S. No. 12 Collingwood, from which he received High School Entrance standing and the academic requirements for admission to the Meaford Model School. After attendance at the Model School he taught in rural schools of his home township for a period of five and one-half years. In 1890, he entered the Collingwood Collegiate Institute where in 1894 he completed the course for the Senior Leaving examination. He then attended the University of Toronto and the Toronto School of Pedagogy and in 1897 obtained specialist standing in Science. From 1897 to 1917 Mr. Carefoot taught very successfully in secondary schools in Smithville, Thorold, Collingwood, Newmarket, Lindsay, in Bradford as principal for six years, and finally for a period of six years as science master in the St. Catharines Collegiate Institute. In his work as a public school in-

spector from August 17th, 1917, to August 31st, 1941, Mr. Carefoot had outstanding success. During his period of office seven new school buildings were erected and substantial and modern additions made to nine other schools. In addition to the raising of school standards in general to a high point of efficiency, Mr. Carefoot gave particular attention to better school libraries, to better provision for the health and health training of the pupils, to the extension of the teaching of music in rural as well as urban schools, and to rural school fairs and the annual exhibition of school work in each school. Mr. Carefoot was an educational leader as well as a school supervisor. By acquainting the school boards and ratepayers of his inspectorate with the newer movements in education he was able to secure their co-operation in the introduction of changes; the result being that the schools of Lincoln County are efficient and progressive beyond the average.

Mr. W. H. T. Mooney, B.A., B.Paed. (Toronto), was born in Rondeau, in Kent County. He received his elementary school education in a public school in the Township of Harwich and his secondary school education in the Ridgetown Collegiate Institute. After attending the Chatham Model School he taught for a few years in the Townships of Orford and Howard. He then attended Toronto University and in 1901 received a B.A. degree with honour standing in classics. He then obtained a high school specialist certificate in classics from the Ontario Normal College, Hamilton, and became classical master in Arthur High School and later in London Collegiate Institute. He was also principal of the London Central Collegiate Institute for a number of years. In January, 1923, he became classical master of the Toronto Normal School. In 1938 he was appointed public school inspector in the inspectorate of York No. 1. Mr. Mooney was an excellent teacher and principal, a splendid administrator and a very competent inspector.

Dr. Peter F. Munro, M.A., is a native of Lancaster Township in the County of Glengarry, where he received his elementary education. He attended Williamstown High School and entered Queen's University, from which he graduated in 1898 with honours in Classics. For his professional training as a teacher he attended Kingston Model School and the Ontario Normal College in Hamilton, obtaining a Specialist certificate in Classics. His public school teaching covers experience in rural schools as well as in urban city schools. He was principal of Ryerson Public School, Toronto, from 1919 to 1925 when he became a public school inspector for the City of Toronto. He retired from this position at August 31st, 1941. Dr. Munro taught as classical master in the Iroquois High School, and the Aylmer Collegiate Institute, in the Aurora High School, of which he was also principal, and in Jarvis and Riverdale Collegiate Institutes in the City of Toronto. He obtained his B.Paed. degree in 1904 and the D.Paed. degree in 1926. Dr. Munro had a brilliant career as a classical master and as a public school inspector.

Mr. Samuel Shannon, B.A., was born in the Township of Elma, Perth County, and received his elementary education in S.S. No. 4 Elma. Subsequently he attended Listowel High School, in which he obtained certificates for entrance to Model School and to Normal School. He secured his First Class Certificate, with the science option, through private study. Mr. Shannon attended the Mitchell Model School in 1888, and began his teaching experience

in S.S. No. 4 Elma, his home school. Later he attended Albert College, Bellevill, from which he matriculated with honours in 1892. He then entered the University of Toronto, and graduated in the Natural Science Honour course in 1895. After attending the School of Pedagogy he became the first principal of Drayton Continuation School. Mr. Shannon was one of the prospectors who followed the famous trail of '98 into the Yukon. He was for some years an assayer in British Columbia, and taught for three years in the schools of British Columbia. On his return to Ontario he was principal of Bracebridge Public and Continuation School, then of Kenora High School, resigning the latter position to become Inspector of Public Schools for the District of Kenora. Mr. Shannon was a very successful teacher and principal and an inspector who endeared himself to his teachers and pupils through his kind, sympathetic and helpful service.

Mr. W. W. A. Trench, B.A., was born at Richmond Hill, and received both his elementary and secondary education in his home town. He then attended the Newmarket Model School and had a six-year period of successful public school teaching experience at Cartier, Unionville, Richmond Hill and Eganville. In 1899 Mr. Trench completed the Honour Classics course at the University of Toronto and then took his professional training at the Ontario Normal College in Hamilton, receiving his certificate as a specialist in classics. His secondary school teaching experience was obtained in Arthur, North Bay, Port Hope, Arnprior, Prescott and Perth. At Prescott he was principal of the High School for a period of seven years. He was principal of Perth Collegiate Institute when in September, 1921 he was appointed Public School Inspector in York County. Mr. Trench took a keen interest in the primary work and the supplementary reading of his schools, and during his period of office the schools of his inspectorate showed splendid advancement in these respects as well as in the other phases of elementary school work. He also trained his teachers to secure good discipline without resorting to drastic punishment but by enlisting the co-operation and arousing the interest of their pupils.

III. APPOINTMENTS:

The following were appointed to the provincial staff of inspectors to begin their duties on September 1st, 1941:

1. Hastings North: Mr. H. H. Loucks, B.A., Principal of Morewood High School.
2. Lanark: Mr. J. W. Barber, B.A., Supervising Principal, Renfrew Public Schools.
3. Stormont: Mr. F. L. Barrett, B.A., B.Paed., Helping Teacher in Kent County.
4. District Division I: Mr. R. S. McBurney, B.A., B.Paed., Principal of Cornwall Public School, Port Arthur.

HELPING TEACHERS:

5. Kent: Mr. William Rogers, B.A., Principal of Major Ballachey Public School, Brantford, to assist Inspector G. A. Pearson.
6. York (3) and (4): Miss Jessie I. Cross, B.A., of the Toronto Normal Model School staff, to assist Inspector W. A. Fydel.

V. EXCHANGE BETWEEN INSPECTOR AND NORMAL SCHOOL MASTER, FOR ONE YEAR FROM SEPTEMBER 1ST, 1940.

Mr. J. V. Scalan, B.A., R.C.S.S. Division XIII, with Mr. J. V. McIntyre, B.A., B.Paed., Hamilton Normal School.

Legislative Grants

The Province apportioned, in 1941, the sum of \$4,706,554.84 in the form of general legislative grants to the public and separate schools. This was the largest amount apportioned in any one year in the history of the Province. In the preceding year the amount of \$4,038,377.06 had been apportioned. The additional amount distributed in 1941 enabled many rural schools in the poorer parts of the Province to make payment on indebtedness and to give better service in their schools. The people have expressed, through the inspectors and directly to the Department, their appreciation of these increased grants.

Township School Areas

Under Sections 15 to 18, inclusive, of The Public Schools Act, the conditions for the organization and administration of township school areas are set forth. The council of a township may pass a by-law on or before the first day of July in any year, setting apart the whole or any portion of the township as a township school area. The by-law which takes effect on December 25th following requires the approval of the Minister of Education before it is finally passed. The board of trustees of a township school area is composed of five members, three trustees being elected each alternate year for a period of two years, and two being elected each alternate year (other than the years of election for the three) for a two-year period.

The Act makes provision for the adjustment of claims between the respective parts of the township when amalgamation takes place, and when the by-law goes into effect all school properties and other assets become vested in the one new board and the new board assumes also all liabilities. As an aid in the adjustment of the finances of the different portions comprising the new area, the Department of Education gives in addition to the regular legislative grant an annual grant of \$100.00 per school section.

There were 15 township school areas or township school boards formed in the Province before the year 1938, involving the dissolution of 83 school sections.

In the years 1938, 1939, 1940 and 1941 additional school areas formed were, respectively, 15, 43, 26 and 31, involving the dissolution of 582 more school sections. At the end of the year 1941 there were 130 township school areas and 666 school sections dissolved. These areas are found in nearly all parts of the Province, and it can be said that in all parts of the Province opinion has grown more favourable to the larger rural unit for school administration. The inspectors, through patient and tactful effort, have brought this matter to the attention of ratepayers, trustees and members of municipal councils, and have followed up the organization of the areas with their co-operation and guidance.

Some of the advantages claimed for the larger area of school administration are as follows:—

1. Better provision for completing courses for those leaving school at 15 and 16 years of age.
2. A more equal school privilege for each rural pupil and a more equal distribution of educational costs.
3. The raising of the standards of the poorer schools in the community.
4. The possibility for the better placement of teachers, a more healthy competition among rural teachers of the same area, the closer association of rural teachers in helpful groups, a greater contentment and happiness among rural teachers, and the elimination of teachers who become failures through lack of a natural aptitude for teaching or for other reasons.
5. The greater opportunity afforded of engaging special teachers of music, manual training, household science and agriculture, as well as of engaging school nurses and the carrying out of an adequate health programme for rural pupils.
6. The saving in expenditures for text books, library books, school supplies, etc., by purchasing in larger quantities at wholesale costs.
7. Increased local control of the schools, more interest in the needs of the schools, and more competent school boards as a result of trustee meeting regularly to discuss ways and means of improving the schools from all points of view.
8. More frequent joint conferences of teachers and trustees.
9. The possibility of the inspector meeting each larger unit board in his inspectorate once or twice a year.
10. Greater possibilities for co-operation in a broader manner than can be possible in the school section.
11. The improvement and beautification of school grounds and school buildings.
12. Better provision for practical courses for young people through night classes.
13. Greater opportunity for providing arrangement transportation of senior pupils to secondary schools or to Grade IX and X classes at suitable centres.
14. The readiness of dealing with a situation where a school of low enrolment has been closed until the increased number of pupils will warrant its reopening.

UNIONDALE PUBLIC SCHOOL
S.S. 4, East Nissouri, Oxford County

The Old School

This building, erected in 1875, superseded a log school built in 1860.

The New School Opened November 27th, 1941

Courtesy St. Mary's Journal Arg

This modern rural school building, costing \$6,300, is rug-brick with a cottage roof. It is designed to serve not only as a school but also as a community centre. Modern features include a teacher's room, built-in wardrobe, built-in bookcases, recreation room in basement, venetian blinds, indirect lighting, and flood-lighted stage.

New Township School Areas were formed in 1941, as follows:—

Township	No. of School Sections	County or District	Inspector	Date
1. Burleigh N. and Anstruther	5	Peterborough	L. W. Copp	Mar. 8
2. Darling	6	Lanark	L. B. Hyde	Mar. 22

Transportation of Rural Pupils to Secondary Schools

The new courses of study for Grades IX and X (Fifth Classes), including the more practical subjects of business practice, shop work, home economics and agriculture, have made it almost impossible for the one-teacher school to do satisfactory work beyond High School Entrance standing. In two-roomed schools it is possible to offer satisfactory courses in Grades IX and X; but for the pupils of the many rural areas within easy reach of a continuation school, a high school or a collegiate institute it is much better to have the rural secondary pupils taken by transportation to the nearest secondary school. Some three years ago the Department of Education began offering rural boards of trustees a special grant if the boards, in groups of two or more, undertook to arrange for the transportation of the pupils to a secondary school. The arrangement proved to be most satisfactory to the rural people, with the result that approximately 350 boards of rural school sections now transport pupils to secondary schools. In this fiscal year the Department of Education will pay in grants for this service, on the basis of 50% of the cost, the sum of approximately \$55,000.00.

The cost of equipping small high schools for the practical subjects makes it necessary that the schools which are provided with the necessary equipment should be as widely distributed as possible, in order that the high school needs of both rural and urban areas may be served economically.

The Scarcity of Qualified Teachers

Some six years ago it was estimated that the Province had a surplus of 3,000 qualified elementary school teachers who were without positions. This fact, and the lowered salaries paid in rural schools led to a rapidly decreasing annual attendance at the Normal Schools. When war broke out the young male teachers enlisted in large numbers. The number of marriages also increased rapidly, again taking a large number of young women teachers. Increased Federal Government office staffs has also taken a large number of teachers, particularly in the Eastern portion of the province. The net result is that at the end of the calendar year 1941 the province finds it necessary to give provisional or temporary standing to slightly more than 200 teachers in order that all the schools may be continued in operation. This situation will undoubtedly grow more serious in September, 1942, and it may become necessary to give temporary certificates to some 400 or more teachers at that time. The inspectors throughout the Province have surveyed the situation and many qualified women teachers have been brought back to the profession of teaching for the war period.

In September, 1941, the Department found it necessary to admit to the Normal Schools young people with standing in eight Upper School subjects rather than nine as formerly. It was also found necessary to lower the age of admission to the Normal Schools of applicants who had the necessary academic standing.

The schools may suffer somewhat in the efficiency of the work done, due to the number of unqualified teachers; but every effort will be made to keep the schools open and to stimulate all teachers to give their best service in the training of the pupils.

The Temporary Closing of Small Schools

Section 87 of The Public Schools Act gives the Minister of Education power to direct that a rural school be closed where for two consecutive years there have been fewer than eight pupils between the ages of five and fourteen years resident in the school section. It has not been the practice to make use of this power arbitrarily. The inspectors have discussed the advantages of closing a small school temporarily with the local trustees, and in most cases the boards have closed the school by their own resolution and, with the help of the inspectors, have arranged for the admission of the pupils to a neighbouring school or schools. In some cases the establishing of a transportation service by the board concerned has been necessary; but in all cases the closing has meant a considerable saving to the local ratepayers and a distinct educational advantage to the pupils, who find the work more stimulating in a school where the class-groups are of normal size. Over the period 1937 to 1941, inclusive, 272 rural schools have been closed, and in some cases reopened, as indicated in the table below:—

Correspondence Courses

The success of the correspondence courses conducted by the Department of Education is evidenced by the increased enrolment of pupils. The total enrolment for the school year was 2,516. These lessons found their way into isolated homes from Moosonee, on James Bay, to Windsor, in Southern Ontario. Wherever His Majesty's mails could go by rail or airways the opportunity has been made available to children to pursue their studies in close conformity to the new courses of study, in their own homes. In addition these courses were made available to bed-fast patients in practically all the Sanatoria and Preventoria of the Province. During the last school year 61,968 lessons were submitted to this Department for supervision and correction. Ontario missionaries in Trinidad, Venezuela, Paraguay and the Belgian Congo were also provided with courses so that their children might follow the Ontario course of study.

The effectiveness of these courses was shown by the fact that at the Entrance examination, out of 25 pupils who were recommended to the High School Entrance Boards in the various localities 20 were granted their standing without writing the examination and the five who wrote not only succeeded in passing but stood well in the upper brackets among those who wrote at their respective centres. It is also quite apparent that by the use of correspondence courses the child of average intelligence may under favourable home conditions, reach Entrance standing at as early an age as one who attends a regular school.

The results in Grades IX and X have been equally satisfactory. In these grades one pupil completed seven subjects during the year, 5 completed six subjects, 5 completed five subjects, 25 completed four subjects, 7 completed three subjects, 13 completed two subjects, and 8 completed one subject. Those pupils completing fewer than four subjects in many cases enrolled later in the school term and thus could not complete the courses by June; but in those cases the pupils on enrolling in September may carry on from the last lesson completed in June. The courses in Grades IX and X serve a real purpose to pupils between the ages of 16 and 21 who have been out of school for some time and who have the desire to continue their studies but are prevented from doing so for various reasons.

The staff of the correspondence courses consists of 20 full-time teachers. The Department also supervises the recently introduced courses of the Canadian Legion for enlisted men, in Introductory English and Social Studies.

Railway School Cars

There has been little change in the School Car situation since the annual report of a year ago. The seven cars are pursuing their helpful way under the good work and careful management of the following teachers:—

C.P.R. School Car No. 1 — W. H. McNally
 C.P.R. School Car No. 2 — William Wright
 C.N.R. School Car No. 1 — Fred Sloman
 C.N.R. School Car No. 2 — William Fleming
 C.N.R. School Car No. 3 — A. D. Clements, B.A.
 C.N.R. School Car No. 4 — H. F. Antoniak
 T. & N.O.R. School Car — Angus McKay

The enrolment remains practically the same, ranging from 22 to 55 pupils per car. Several former school car pupils of Grades IX and X are now attending high and technical schools in nearby centres. One of these, Miss Eleanor White of Sowden, who took her Grade X work at that point on C.N.R. School Car No. 2, under Mr. Fleming, and now attending technical school in Port Arthur, was awarded the Canadian Daughters' League scholarship of \$25.00 as the student who made the most progress during the year.

A new spur has been installed to accommodate C.N.R. School Car No. 4 at Amesdale, Quibell subdivision, near Sioux Lookout. Eleven children of school age are now being cared for at this point.

Possibly no other school services in Northern Ontario have received more appreciative comment than the correspondence courses and the school car service. The children served by the school cars live at lonely points along or near the railway lines of the northern part of the Province, where there are an insufficient number of children at any one point to warrant the organization of a public or separate school.

Music

A few years ago Music was regarded as one of the "frills" of the elementary schools. There was a demand, however, particularly on the part of mothers in the rural areas, for the further teaching of Music in the elementary schools. In 1934 the Department of Education appointed a Provincial Supervisor of Music, and since that time many special itinerant teachers of Music have been appointed in rural areas. The advancement of the subject in the public and separate schools over the last seven years is shown in the following table:—

Classrooms Giving Instruction in Music

	1935	1941
Cities.....	95%	98%
Counties.....	33%	78%
Districts.....	15%	53%
Separate Schools.....	18%	28%
Total.....	43%	72%

Music Festivals in the Spring of the year, toward the close of the school year, have done much to stimulate interest in the subject and to demonstrate to parents and ratepayers the quality of the work being done by the special and the regular teachers.

The Department of Education has supported the work in Music through special grants amounting to approximately 50% of the cost in the rural areas.

Health Teaching and School Medical Inspection

In the new courses of study for both elementary and secondary schools much greater emphasis has been placed on health teaching and the formation by the pupils of good health habits. No rapid extension of health services in the elementary schools has been made during the past year, but in those areas where the school trustees or the local Board of Health is offering a school medical inspection service the work has been well done, and a marked improvement in the general health of the pupils has been shown.

Authority has now been granted to county councils to provide for the employment of public health nurses for school health services at the expense of the county. Oxford County has taken advantage of this new legislation granted in 1940, and a splendid health service in all the schools of the county is now under process of organization. Some acceptable type of school health supervision exists in 197 municipalities. In 82 of these the service is locally operated by the school board. In 96 of these the service is locally operated by the Board of Health. There are 13 school medical inspection units which are combinations of rural and urban boards for this purpose. They are chiefly situated in the Niagara Peninsula. In 36 centres a dentist is associated with the service. Three hundred and thirty-eight nurses are engaged in this work, part time or full time. With the exception of three full-time and two part-time nurses, the special qualifications required by the regulations are met by the nurses.

In 24 centres school health supervision of some type has been extended to secondary schools.

The total amount expended in grants for medical and dental inspection for the year 1939 was \$12,471.00.

The report of the extent to which male adults between 21 and 24, inclusive, are seriously handicapped by physical defects, recently presented by the Minister of National War Services for Canada, should again focus the attention of the local school authorities on the extension of school medical inspection to secondary school pupils. The statement that only 61.69% of all such young males are eligible for admission to Category A is of too great significance to pass over lightly. In many instances undoubtedly the presence of these defects had been drawn to the attention of disinterested or procrastinating parents when the individual was in attendance at the elementary school. In others no health service was in effect in the community in which the person affected attended school. Again, in others, the condition found was a development of adolescence and could not therefore have been recognized during the elementary school period. Irrespective of the relative significance of the various factors contributing to this most unfortunate state of affairs, the situation would appear to be of sufficient importance to warrant early action by all of the official agencies concerned.

Interchange of Teachers

Interchange of teachers between Ontario and other parts of the Dominion and of the Empire has suffered further curtailment because of the war. For the school year 1941-42 no attempt was made to arrange new overseas exchanges. The number of exchanges with teachers in other provinces was affected by the evident desire of teachers to remain with their families during this trying period.

Ord Marshall House, familiar to overseas exchange teachers as the headquarters of the League of Empire, has been damaged by enemy action. However, from temporary quarters nearby the Secretary, Miss E. A. Doggett, O.B.E., has sent letters appreciative of the contribution made by those exchange teachers

whose return to their homes was delayed during the summer of 1940 and by those who were unable to leave the British Isles during the years 1940-41 and 1941-42. Not only have these teachers adapted themselves admirably to changed conditions in educational work, but in addition they have assumed their full share of the many wartime duties of civilians.

Through the co-operation of Education Authorities overseas and in Ontario, it was possible to arrange extensions of the exchange period for those teachers who were unable to secure passage in time to resume their duties at home in September, 1941. Exchanges were arranged for the school year 1941-42 as follows:—

- 1 Ontario Public School teacher on exchange in Scotland
- 1 Ontario Separate School teacher on exchange in Scotland
- 3 Ontario Public School teachers on exchange in British Columbia
- 1 Ontario Public School teacher on exchange in Alberta
- 1 Ontario Public School teacher on exchange in Nova Scotia
- 3 Ontario Secondary School teachers on exchange in British Columbia
-
- 10 Ontario teachers on exchange during 1941-42.

Conclusion

The year 1941 was a very busy one for the elementary schools of the Province. In each inspectorate there were campaigns for funds in support of such organizations as the Junior Red Cross and the Navy League, and there was a constant and increasing effort toward the sale of War Savings Stamps and War Savings Certificates. Funds were raised by teachers and pupils for the purchase of ambulances and toward the different war charities and war relief funds. It is unfortunate that at the present time there is no summary available of the vast war effort of the pupils and teachers.

The regular work of the schools was well done in all parts of the Province, in spite of the many changes of teachers due to enlistments and to the entry of many teachers into office work, munitions factories and other activities pertaining to the successful conduct of Canada's war effort. No professional body has been called upon during the year to undertake more additional duties than the elementary school inspectors. They have responded willingly to every call and have given splendid leadership in both their regular school duties and in the more special duties of this critical period.

Except for very minor interruptions in a few areas, the elementary schools have been open for the full year. The attendance of the pupils has been maintained at a high level of regularity, and the proficiency of the pupils has never been higher. The teachers and inspectors are worthy of highest commendation for their untiring zeal and efforts in the best interests of the pupils.

Acknowledgment is made and thanks offered to all the officials who have made contribution to this report.

V. K. GREER,

Chief Inspector of Public and Separate Schools.

Toronto, March 31st, 1942.

Courtesy of the School Board

The Ridge Public School, Mersea Township, Essex County

This modern, four-room school has recently been erected at a cost of approximately \$46,000 for building, and \$6,000 for equipment, and is fireproof throughout. This structure has library, teachers' room, and complete kitchen. The basement contains a separate playground for boys and girls, locker rooms and emergency nurse's room. Other special features include flush ceiling reflector blackboard lights, a thousand gallon per hour water pump, fire hose, asphalt tile floors, and moveable chair type desks.

The Board has already laid plans for levelling, seeding and planting the grounds.

APPENDIX B

REPORT OF THE CHIEF INSPECTOR OF SECONDARY SCHOOLS

I have the honour to submit herewith the reports of the High and Continuation School Inspectors and the Director of Vocational Education, for the school year 1940-41.

G. F. ROGERS,

Chief Inspector of Secondary Schools.

Toronto, August 22nd, 1942.

1. Report of the Inspectors of High and Continuation Schools

The school year 1940-41, the second during the progress of World War II, might well be expected to show a much greater effect of the war on the life and work of the schools than did the preceding year, 1939-40, which was already under way when war was declared.

In certain respects, however, the statistical record does not indicate any marked effect. Three new schools were established, a High School at Geraldton and Continuation Schools at Dublin and Port McNicoll. In addition Kirkland Lake High School was raised to the status of a Collegiate Institute and Preston Continuation School became a High School. The total number of teachers employed in the High Schools and Collegiate Institutes shows an increase of 93 over the previous year. In the Continuation Schools there was an increase of 18. In average salaries paid, small increases are shown, in the case of Collegiate Institutes and High Schools an increase of \$2.00, and in the Continuation Schools one of \$7.00. On the other hand, the total enrolment in the secondary schools shows a decrease. There were 5,711 fewer pupils in the High Schools and Collegiate Institutes and 846 fewer in the Continuation Schools. These decreases, however, show not so much an effect of the war as they do the continued effect of the general decrease in attendance in the Public Schools which has been noted for several years.

While, as pointed out above, the total number of teachers in the secondary schools shows a slight increase in spite of a considerable decrease in attendance, this is accounted for probably by two facts: first, in the great majority of the Continuation Schools, and in the smaller High Schools, the staffs have been so small that they could not be reduced further if they were to continue to carry on the full course of four or five years' work as heretofore; second, in the larger schools there was considerable overcrowding in previous years, and a corresponding high ratio of pupils per teacher in many schools. In these larger schools the effect of the decreased attendance has been to relieve the congestion in the classes and to reduce the ratio of pupils per teacher more nearly to the ratio of 30 to 1, which is set forth as a maximum in the High School Regulations. As the year progressed the number of teachers employed showed some decrease through enlistment for military service. Such enlistments were mainly from among the teachers of Physical Education, Mathematics and Science, and a shortage of teachers in these departments began to be noticeable. No record of these enlistments will be attempted here, as a complete record of enlistments of members of the teaching profession is being tabulated at the Department and will, it is expected, be published at the conclusion of the war.

In the matter of the new courses of study, which were being introduced in one grade at a time, those for Grade XII were offered this year, although the war had the effect of limiting and modifying them to some extent. The new course in Geography for Grade XII was printed and, like the new Grade XI course, was offered as an option; the projected courses in Biological Sciences for the Middle School were not established as had been planned; the new Grade XI course in Ancient and Mediaeval History was introduced, and this was taught, in a few cases, to pupils of Grade XII as well. These limitations were made to avoid, where possible, the necessity of introducing new textbooks.

In the operation of the schools themselves the effects of the war were noticeable in several ways. The length of the teaching year was considerably shortened, both at the beginning of the year in September and at the close of the year in May or June, by special arrangements which allowed pupils to assist with the work on the farms, and, in some cases, in essential war industries. This shortening of the year placed heavy responsibilities upon the teachers, as it required them to organize the work in each subject so as to cover as well as possible the whole course in a shorter time. The teachers as a body responded loyally to this emergency. Special classes were organized for pupils who had lost time, or private assistance given, in order to assist them in covering the work which they had missed. To quite an extent the situation was met also by a greater application on the part of the pupils themselves.

The effects of the war on the pupils were shown also in their general extra-curricular programme, which now began to include more activities directly connected with the war. The pupils were organized under their teachers to assist in the various war efforts of the community in which the school was located. The extent of these activities and something of the work accomplished is shown in the tabulated statement which follows:

	Collegiate Institutes	High Schools	Continua- tion Schools	Private Schools	Grand Total of Secondary Schools
Number of Schools.....	72	159	200	91	522
Number Reporting.....	65	130	130	56	381
War Certificates sold.....	\$259,763.35	\$129,537.85	\$25,793.85	\$16,362.25	\$431,457.30
War Funds:					
1. Navy.....	1,030.39	488.64	253.84	153.74	1,926.61
2. War Victims.....	2,733.96	1,930.33	1,010.73	165.01	5,840.03
3. Others.....	11,301.23	7,791.80	1,744.95	3,946.80	24,784.78
Red Cross:					
1. In cash.....	6,541.55	6,823.20	2,556.38	2,053.08	17,974.21
2. In value of garments made.....	15,672.40	11,078.27	1,640.60	1,349.50	29,740.77
Other Gifts.....	5,769.21	572.03	35.00	143.70	6,519.94
Value of Salvage collected..	2,276.88	1,786.40	1,036.53	299.40	5,399.21
Total funds raised for War purposes.....	\$305,088.97	\$160,008.52	\$34,071.88	\$24,473.48	\$523,642.85
Special Training Courses Taken:					
1. St. John's Ambulance	2,544	815	18	128	3,505
2. Nursing.....	1,875	478	79	93	2,525
3. Other Courses.....	2,648	711	97	324	3,780
All Courses.....	7,067	2,004	194	545	9,810

This tabulated statement scarcely tells the whole story. Among the schools from which reports have not been received are a number of large schools. These schools would probably have reported considerable amounts raised. Many of the schools reporting did not keep complete records for the school year 1940-41, and were careful not to overstate their totals. This was particularly true of the amount and value of the garments made for the Red Cross and for associated bodies, and of the tonnage and value of waste material salvaged. Where values were not reported by the school they have been arbitrarily set, for the purpose of this report, at 50c. per garment, and at \$8.00 per ton of salvage, respectively. Again, many of the schools reported that in the Red Cross work and in the collection of salvage the pupils worked through the community organization, and thus the school's share in such work could not be reported separately. In addition to the types of work tabulated above other war activities were reported from many schools. Great quantities of books and magazines were collected, sometimes for direct contribution to training centres, more often for distribution through one or more of the War Service organizations. Most schools, also, have established lists of ex-pupils now serving with the armed forces, and have organized to keep in regular touch with them by sending boxes of comforts and special treats. Occasionally the school camera club has made up folders of school and town views as reminders of home. Other schools have made and packed "ditty bags" for the sailors.

The raising of more than half a million dollars for the prosecution of the war, by 381 of the secondary schools of the province, is no small accomplishment. Judging from many reports received, however, there is little doubt but that the total for the year 1941-42 will be close to the million mark.

The record of the war service of the high school boys and girls would be incomplete without some report on the assistance given by many of them in farm work or in other essential war industries. The records of the Middle and Upper School examinations show that 8,268 pupils were granted their certificates on the submission of evidence of at least eight weeks at such work during the season of 1941. From the Department of Labour, also, comes the statement that 14,000 secondary school pupils worked on farms during the same season.

When visiting the schools the Inspectors have found increasing evidence of the effect of these war activities on the pupils engaged in them. The very considerable help that they have been able to give in the prosecution of the war has had its natural reflex influences. Pupils generally have applied themselves more zealously to their school work, and have come to realize the direct bearing of much of their studies on the practical affairs of life. The events of the war from day to day have been used quite frequently by both teachers and pupils to give an added interest to various subjects, and undoubtedly too these young people have now acquired a clearer understanding of the issues involved in the war. All these effects must, in turn, help determine every pupil's ideal in life and his choice of a vocation.

During the year 89 private schools applied for and were granted inspection of their Middle School classes in order that they might be permitted to recommend for certificates those of their pupils who should complete their courses successfully. This was the second year of such inspection for the majority of these schools, and it was very gratifying to note evidences of improvements in the facilities for teaching the courses, in the qualifications of the teachers in some cases and in the character of the work done in the classroom. Since the

previous inspection a number of these schools had provided excellent facilities for individual practical work by pupils in Science. In a few cases the laboratories provided were of such excellence that they might well serve as models for other small schools that are not now as well equipped. Several other schools of the tutorial type, where previously Physics and Chemistry had been taught almost wholly from the textbook, this year had devised special furnishings and equipment in order that their pupils, either individually or in groups, might perform the prescribed experiments in Science. In several of the private schools other improvements in accommodations were effected, such as better classrooms, improved lighting and more blackboards.

We would offer a tribute of esteem to the memory of the following teachers who, during the last seven years, have been removed by death after more than twenty-five years of faithful service in the profession: Claire A. H. Hitchon of Belleville; Arthur M. Overholt of Brantford; John A. Anderson of Brockville; David Knight of Central Collegiate Institute, Hamilton; Norval J. Ireland of South Collegiate Institute, London; Col. C. H. Vandersluys of Niagara Falls; Norman A. Irwin of Glebe Collegiate Institute, Ottawa; Jessie Muir of Lisgar Collegiate Institute, Ottawa; Alexander W. Baird of Renfrew; W. Oliver Asselstine of St. Catharines; Albert Williams of Forest; and Alfred C. Bernath of Huntsville.

During the year the Inspectoral staff was increased by the appointment of Mr. Henri Lemieux, from the staff of the Ottawa University Normal School. His education, training and experience qualify him to render a distinct service.

Toronto June 30th, 1942.

2. Report of the Director of Vocational Education

Due to the introduction of War Emergency Classes in the vocational schools during the holiday months of July and August 1940, the commencement of the term in September was marked by a number of perplexing organization problems. At the request of both the Federal and Provincial Departments of Labour, the Minister decided to continue the special war classes after the opening of school and arrangements were made accordingly to provide for these concurrently with the regular day and evening classes. As teachers of trade subjects were required for this practical work, the regular day staffs were called upon to fill the need. Classes were operated in some schools for the entire twenty-four hours of each day, involving a serious physical strain on the shop instructors and necessitating a drastic rearrangement of time tables. Co-operation on the part of principals, directors, and instructors succeeded in overcoming the difficulties, and a dual programme was conducted throughout the year with little interruption of the regular work of the schools. In order to ensure the greatest possible use of the available shop accommodation and equipment for the war effort, the hours of

the day-school students were staggered in several schools while in others, certain non-essential night classes were discontinued entirely. The vocational schools became the training ground for a vast industrial army.

From the introduction of the scheme in July 1940 to the end of June 1941, 25,616 men and women, out of a total for the whole Dominion of 41,758, were given special training in Ontario vocational schools to fit them for industrial war work, and 6,450 members of the armed forces, out of a Dominion total of 18,920, received instruction as artificers and technicians. Ontario thus provided, from 28 vocational schools, out of a total of approximately 100 schools of all types spread across the Dominion, over 61% of the industrial trainees and 34% of those preparing for entry into the army, navy and air force under the War Emergency Training Programme. Training was given in aircraft manufacturing, machine shop practice, sheet metal work, welding (acetylene and electric), industrial chemistry, cooking (for men and women in Army services), electricity and radio mechanics, pattern making and woodworking, automobile mechanics, blacksmithing, drafting, plumbing and related blue-print reading and mathematics. Instruction was also offered in preparation for clerical and accounting positions in the army and air force. The training of women for industry was restricted to sponsored classes, mostly in power sewing-machine work and light welding. Special courses for radio technicians were provided in the Central Technical School, Toronto, the Westdale Technical School, Hamilton, and the Ottawa Technical School. The results of the external examinations set by the R.C.A.F. for candidates trained in these 3 schools were so commendable that special mention was made in the report of the examiners of the outstanding success achieved by these particular trainees. A number of fine-instrument workers were trained in the Central Technical School, Toronto, and the Ottawa Technical School; and courses for tool improvers were inaugurated in the Western Technical School, Toronto, and the Westdale School in Hamilton. The usual length of each of the courses was three months, or 13 weeks of 44 hours, which, compared to an ordinary school week of 27 hours, will illustrate the strain under which the shop teachers have been working. In the case of tool makers, radio mechanics, and instrument makers, the courses were extended to 6 months, approximating 1,144 hours of training. The majority of trainees took the general metal working course outlined in my report of last year.

These emergency courses, designed to train skilled and semi-skilled workers for war industry and the armed forces, were inaugurated under an agreement between the Federal and Provincial Governments, whereby the Provinces assumed the cost of administration and 50% of the cost of the special equipment required. The Dominion accepted the responsibility for the remaining 50% of the equipment cost, and for teachers' salaries, supplies, and subsistence allowances to trainees. The vocational school shops and equipment were made available by the local school authorities unhesitatingly and without charge. This spontaneous co-operation on their part is fully appreciated and gratefully acknowledged.

Until March 31, 1941, the War Emergency Programme in Ontario was administered by the Vocational Branch of the Department of Education. Subsequently an inter-departmental committee was formed, consisting of representatives of the Departments of Education and Labour, with a Regional Director appointed by the Dominion Government as secretary. Administration offices were opened in the East Block of the Parliament Buildings at Toronto, and Inspector A. M. Moon of the Vocational Branch of the Department of Education

was loaned to the committee as Director of Training. Inspector Moon was active in organizing the initial training programme, and its subsequent success is largely attributable to the energy and organizing ability he displayed in the early stages of the movement.

The vocational school has proved to be an organization capable of swift transition from a peace-time programme to one which meets the necessities of war. It is fortunate for this country that at the outbreak of war, the extensive accommodation, equipment and qualified technical staffs of these institutions were available to train the thousands of mechanics required by industry and the armed forces. In Ontario, especially, where a successful system of vocational education has been in operation for over twenty years; where skilled tradesmen receive intensive training to qualify them as teachers; and where the school boards, from the outset, have enjoyed a close contact with industry through advisory vocational committees representative of both employers and employed, the vocational schools have shown an amazing adaptability to war-time requirements. The expansion of the facilities of the workshops to accommodate an unprecedented influx of metal workers, aircraft mechanics, radio technicians, tool makers and artificers for the army, navy and air force, as well as the civilian personnel required for the production of war materials, was brought about with a smoothness that has won the admiration of military and civilian authorities alike. This transformation has taken place with practically no interference with the daily instruction of thousands of adolescent boys and girls, who by training and aptitude, will later be capable of taking an important part in the conflict should the present urgent need for mechanics persist. It is scarcely an exaggeration to state that without the vocational schools the war effort of the Dominion would have been tremendously handicapped and its effective participation in the defence of the Empire seriously retarded.

This outstanding contribution of the vocational schools to the common cause has been made possible by the tireless energy of the shop directors, the unremitting labour of their assistants, the cordial co-operation of school principals, and the unfailing support of local school boards and advisory committees in all matters incidental to the successful prosecution of the war. The vocational shop directors, by virtue of their positions as heads of departments and their engineering training, have a wider knowledge, experience and appreciation of the requirements of industry, and greater opportunities for collecting and distributing information regarding available occupations and employments than any other known agency. Results bear testimony to the determination of all concerned to support the Minister in his endeavour to furnish the semi-skilled manpower without which our labour supply would have been both inadequate and ineffective. A debt of gratitude is owed to these men and women, individually and collectively, for their unselfish devotion to duty.

Regular Day Classes

Notwithstanding the pressure caused by the introduction of war training, the work of the vocational day schools during the year was maintained at a high standard of efficiency. Considerable skill was displayed in the organization of time tables, which in most cases were ready well in advance of the opening of school. The advantage of lesson-aid material, prepared by the teachers for the use of the pupils has been generally accepted. In some instances, a tendency developed in this connection to utilise too freely the services of the commercial students in preparing the lesson sheets. Additional office help was suggested

as a remedy. The necessity for the periodical replacement of obsolete and out-worn equipment, constantly emphasized over the years, is now generally recognised. It is apparent that catalogue costs seldom represent the true value of equipment on hand, and that natural depreciation should always be provided for. In accordance with the instructions of the Minister, encouragement has been given to pupils to participate in Red Cross work or other war services, the time allotment for the practical subjects being increased wherever possible with this purpose in view.

From the comparative statistical table appearing below, it will be seen that a considerable change in enrolment has taken place. Although the number of day schools remains the same as last year, the number of pupils dropped from 36,502 to 30,967, while the number of teachers increased from 1,631 to 1,684, and municipal expenditures (net) increased by \$687,687. This state of affairs is directly attributable to war conditions. On the one hand, many pupils from the senior classes were absorbed by war industry or the armed forces; on the other hand, salaries have mounted, bonuses have been paid, and it has been necessary to employ additional semi-trained or untrained teachers to replace those on active service or loaned for war employment.

Evening Classes

The evening class registration showed a reduction from 34,983 to 32,135, and in this instance, the number of teachers fell from 1,081 to 1,045. Here, too, the war situation has been the main reason for the depleted enrolment. Many adult workers are now employed at night and consequently are debarred from attending evening classes, and a number of non-essential classes have been discontinued to make way for war emergency night shifts and soldiers' training. The character of the general work in the night schools has been satisfactory.

Comparative statistics for vocational schools and departments are as follows:

	1922-23	1939-40	1940-41
Number of Schools—Day.....	16	62	62
Number of Schools—Evening.....	51	48	49
Number of Pupils—Day.....	9,402	36,502	30,967
Number of Pupils—Evening.....	35,511	34,983	32,135
Number of Teachers—Day.....	337	1,632	1,684
Number of Teachers—Evening.....	1,097	1,081	1,045
Government Grants.....	\$638,217	\$1,289,444	\$1,079,818
Municipal Expenditure (Net).....	\$1,233,397	\$4,595,902	\$5,283,589

Peace-time Activities

The versatility of vocationally-trained students is illustrated by the success of pupils from one of our commercial schools in a new diamond industry which was brought to the City of Toronto through the efforts of the Toronto Industrial Commission. The essential pre-requisite for starting the industry was the assurance of suitable personnel. One of the directors of the Eastern High School of Commerce, who has shown particular interest in the placement of students in industry and commerce, and who is in continuous touch with the Commission, suggested that boys and girls from this school could meet the fundamental requirements for workers in the diamond industry. It appears that the delicate operations of the trade call for a combination of manual dexterity and the mental alertness associated with the study of mathematics. The proprietors of the firm made an investigation, and it was found that commercial students, trained in the manipulative skills of shorthand and typewriting, and possessing a back-

ground of practical Mathematics and Science, were exceptionally well-fitted for the requirements of the trade, which consists in sawing, cutting and polishing diamonds.

The outcome of preliminary tests convinced the proprietors that suitable workers were available, and the industry was established in Toronto. Out of 55 apprentices employed by the firm, 32 (of both sexes) were supplied by the Eastern High School of Commerce, and it is stated that, but for the shortage of advanced students, more would have been taken. The proprietors, who escaped from Holland and Belgium at the outbreak of war, freely admitted, after several months of trial, that Canadian boys and girls compare favourably as diamond workers with the young people of Europe, where the business is more or less a family affair, handed down from father to son.

The value of the co-operation of the Toronto Industrial Commission in connection with the placement of Toronto vocational students, cannot be over-emphasized. The Commission keeps the schools informed of the latest industrial and commercial developments, and is the means, not only of introducing into Canada the best of European trade skills and craftsmanship, but of paving the way for the acquirement of these skills and crafts by the young people of this country. The part played by the vocational schools in supplying personnel for the war industries is widely recognized: their contributions to the arts of peace are no less important.

General Shop and Home Economics in High Schools and Continuation Schools

The teacher-training programme, to which reference was made in my last report, received a noticeable set-back by reason of the discontinuance of summer courses. As a consequence, teachers without the regular qualifications are being granted permission to teach for one year only, renewable annually, upon application of the board, until qualified teachers are available. Apart from this difficulty, the work has gone forward with increasing success. The reports of the inspectors indicate a considerable improvement in the standard of work, and this is reflected in the annual grading grants which show a substantial upward tendency. The instruction in shop work is widely diversified and the skills attained in a variety of trades, particularly in farm mechanics, should materially assist local war industries and agricultural production. During the school year 1940-41, 124 secondary schools and fifth classes received grading grants under the Regulations. An important provision of the Regulations is that both General Shop and Home Economics courses must be taught to obtain recognition, except where the school is composed of pupils of one sex only. This provision is to ensure that both boys and girls will have an opportunity to participate in studies of a practical nature.

Manual Training and Home Economics in Public and Separate Schools

As previously explained, two schemes are in operation at the present time, one for urban centres and another for rural areas. Instruction is optional, and either one or both courses may be given. According to the latest available figures, the following is a comparison of the centres holding classes under the two schemes as between the years 1939-40 and 1940-41.

	Number of Centres		
	Manual Training	Home Economics	Total
1939-40 Urban Scheme.....	163	169	332
1940-41 " ".....	148	168	316
1939-40 Rural Scheme.....	407	361	768
1940-41 " ".....	331	285	616

The work of the urban centres has been well sustained. The drop in the number of rural schools is mainly attributable to the discontinuance of grants to teachers. All grants are now paid direct to the boards. The regulations no longer recognise partial certification, and disinterested teachers have withdrawn. Local inspectors are promoting the work in every desirable location.

General Remarks

In this report the war effort of the vocational schools has been mainly under review. All indications point to a consistent endeavour on the part of those responsible for the education of our young people to maintain at the same time the high standard of academic instruction essential to a realization of the meaning of those free institutions for which the allied nations are fighting.

F. S. RUTHERFORD,

Director of Vocational Education.

Toronto, February 17th, 1942.

APPENDIX C

REPORT OF THE DIRECTOR OF PROFESSIONAL TRAINING

Normal School Attendance

Normal School	Number of Students						
	1939-40	1940-41		Total	1941-42		
		Men	Women		Men	Women	Total
Hamilton.....	117	15	108	123	7	103	110
London.....	162	22	106	128	24	148	172
North Bay.....	102	12	72	84	6	78	84
Ottawa.....	133	7	97	104	15	101	116
University of Ottawa (1st).....	36	10	13	23	16	14	30
University of Ottawa (2nd).....	149	29	144	173	13	104	171
Peterborough.....	94	17	64	81	14	79	93
Stratford.....	108	27	76	103	16	92	108
Toronto (1st).....	339	30	241	291	38	236	274
Toronto Primary School Specialist.	7	21	21	8	8
Totals.....	1,247	180	942	1,131	149	963	1,112

In September, 1940, 104 applicants who held but eight of the required nine Upper School papers were permitted by special regulation to enter Normal School. In September, 1941, 76 applicants were thus admitted. Twenty-three teachers from Britain and from the other provinces of Canada who had equivalent Upper School standing and who had attended a teacher-training institution for at least one annual session have applied this year to write the Normal School examinations to qualify for Ontario teaching certificates.

Medical Inspection of Training Schools

All applicants to Training Schools are required to submit to a medical examination before they are finally accepted. In 1937-38 seventeen applicants were rejected; in 1938-39 twenty-seven; in 1939-40 twenty-six; in 1940-41 thirteen; in 1941-42 seventeen. Applicants suffering from physical handicaps of a less aggravated nature are permitted to enter on signing a consent, waiving claim to a disability pension under 'The Teachers' and Inspectors' Superannuation Act. In 1939-40 two signed waivers; in 1940-41 seven; in 1941-42 thirty-eight.

Cost of Medical Inspection, 1940-41

Amount paid physicians for medical examinations: 1,348 at \$4	\$5,392.00
Amount paid hospitals and radiologists for X-ray films.....	473.60
Amount paid for consultants obtained by Medical Board.....	290.00
Refund of fees to students excluded by the Medical Board.....	26.00
Fees paid by students.....	\$2,771.00
Amount paid by Teachers' & Inspector's Superannuation Commission...	1,705.30
Amount paid by Ontario Government.....	1,705.30

\$6,181.60 \$6,181.60

Exchange

For the school year 1941-42 Mr. W. K. F. Kendrick, Master on the staff of the Toronto Normal School, is on exchange with Inspector C. A. Lapp, Simcoe South and York, and Mr. J. V. McIntyre, Master on the staff of the Hamilton

Normal School, with Inspector J. V. Scanlan, R. C. Separate Division XI. Owing to the taking over of the Toronto Normal School by the Department of National Defence, however, Mr. Lapp was assigned to the Inspectorate of York (1), and Miss M. G. Irving, Master on the staff of the Hamilton Normal School, temporarily transferred to the staff of the Toronto Normal School in place of Mr. Kendrick. Seventeen of the thirty-seven Principals and Masters on the staffs of the eight Normal Schools will have now obtained experience in the inspection field. Several Inspectors who have been on exchange with Normal School Masters are being asked this year to assist in the marking of the Normal School examination papers and to take part in the attending conferences. It is felt that these exchanges are doing much to develop a better understanding between the Normal Schools and the Inspectoral group and to continue an interest in professional training among the teachers-in-service.

Toronto Normal-Model School

In response to an emergency request the property of the Toronto Normal-Model School was in July placed at the disposal of the Department of National Defence, Ottawa, for the duration of the war, to be used as an R.C.A.F. training station. The Toronto Board of Education extended wholehearted co-operation in effecting necessary changes. The Model School was discontinued, its four hundred and fifty pupils being largely absorbed the following September by the Toronto Public School system. The Earl Kitchener Public School property, 870 Pape Avenue, was rented from the Toronto Board of Education to be used as a Normal School during the period of the war. The equipment was transferred from the old building and the school opened happily the following September. Mr. Adam McLeod, Headmaster of the Model School, was appointed Acting-Inspector, Frontenac North and Addington; the services of Mr. C. Sharpe were loaned to the University of Toronto Schools; Miss Jessie I. Cross, B.A., was appointed as a Supervising Teacher in York (3) and (4); Miss Doris R. Soden, Miss Jessie McKay, Mrs. K. Crawford and Miss Marion Evans were attached to the Toronto Public School staff; Mrs. Vera S. Fuller, Secretary, was transferred to the Correspondence Courses Branch of the Department of Education.

Changes in Staffs

In addition to those recorded above the following changes occurred on the staffs of the several Normal Schools of the province:—

In August, 1940, Mr. Francis McCordic, Headmaster of the Toronto Model School, retired after forty-three years of teaching service. Mr. McCordic was born and received his early education in the County of Lambton. After serving as Principal of the Brigden, Point Edward and two of the Sarnia Public Schools he was appointed Assistant Master in 1912, Acting Headmaster in 1923 and Headmaster in 1926, of the Toronto Model School. The high ideals of efficient Christian citizenship which characterized his life and his teaching are carried to-day in the hearts of hundreds of graduates from the old Toronto Model School as the result of his untiring devotion.

In September, 1941, Mr. Adam McLeod, Assistant Master on the staff of the Toronto Model School, was appointed to succeed Mr. McCordic as Headmaster.

In May, 1941, Mr. F. Stanley Rivers, Master on the staff of the North Bay Normal School, was loaned to the Canadian Council of Education for Citizenship to serve as Executive Secretary of that organization.

In June, 1941, Mr. Gordon Apperley, Manual Training Instructor on the staff of the Toronto Normal-Model School, and in the following month Mr. Robert G. Kendall, Assistant Master on the staff of the Toronto Model School, were granted leave of absence for the duration of the war for the purpose of enlisting in His Majesty's Forces.

In September, 1941, Mr. J. D. Deyell was transferred from the staff of the Ottawa Normal School to the staff of the North Bay Normal School; Mr. R. H. Roberts from the staff of the Peterborough Normal School to duty as Inspector, Leeds (1); Mr. W. L. Stricker, Manual Training Instructor on the staffs of the Hamilton and the Peterborough Normal Schools, was appointed temporarily to take over the work of Mr. Gordon Apperley in the Toronto Normal School during the absence of the latter.

Mr. W. J. Neale was granted leave of absence, because of ill health, from September, 1941, to January, 1942, and was superannuated as of February 1st, 1942.

In October, 1941, Mr. Stanley Watson, Master on the staff of the Toronto Normal School, enlisted, and was granted leave of absence for the duration of the war. Mr. F. B. Smitheram, Principal of the Callander Public School, was appointed temporarily to the staff of the Toronto Normal School in place of Mr. Watson.

In March, 1942, Dr. O. E. Ault, Master on the staff of the Ottawa Normal School, who was on leave of absence for the purpose of serving as Adviser to the Director of Technical Instruction, enlisted, and his leave of absence was modified accordingly.

H. E. AMOSS,

Director of Professional Training.

Toronto, March 31st, 1942.

APPENDIX D

REPORT OF THE DIRECTOR OF FRENCH INSTRUCTION ON THE SCHOOLS ATTENDED BY FRENCH- SPEAKING PUPILS, 1941

Appointments

Mr. Henri Lemieux, B.A., B.Paed., formerly on the teaching staff of the University of Ottawa Normal School, was appointed High School Inspector in January, 1941. Previous to his Normal School appointment in 1936, Mr. Lemieux had taught for several years in the secondary schools of Plantagenet and Cornwall and had served as assistant principal and as principal of the Model Training Schools at Embrun and Sturgeon Falls.

Mr. Arthur Godbout, B.A., who was on the Kirkland Lake Collegiate Institute and Vocational School staff, was appointed to the University of Ottawa Normal School to succeed Mr. Lemieux.

Teachers' Training and Qualifications

In 1940-41, there were 187 teachers-in-training at the University of Ottawa Normal School, 23 of whom were enrolled in the First Class course, and 164 in the Second Class course. As a result of the term and final examinations, 21 students were awarded First Class teachers' certificates, and 140 obtained Second Class certificates.

The following table shows the number and percentage of Ontario French-speaking elementary school teachers holding First or Second Class certificates in November, 1941, and the progress made in this regard since 1929:—

	1929	1937	1938	1939	1940	1941
Total number of French-speaking teachers in Elementary Schools.....	1,087	1,281	1,316	1,390	1,416	1,438
Number of above teachers holding I or II Class certificates.....	273	1,018	1,135	1,271	1,311	1,307
Percentage of French-speaking teachers holding I or II Class certificates.....	25.11	79.46	86.24	91.43	92.58	90.89

Age-Grade Distribution of Pupils in Elementary Schools

The following tables present a compilation of the French-speaking School Inspectors' Annual Age-Grade Summary Reports for May, 1941:—

TABLE No. 1
AGE-GRADE DISTRIBUTION IN ELEMENTARY SCHOOLS ATTENDED BY FRENCH-SPEAKING PUPILS, MAY 1941

NOTE:—Heavy lines denote ideal age spread for each grade.

The following comparative table, for the years 1938, 1939, 1940, and 1941, shows the marked progress which has been achieved, during the period under review, in the grade-enrolment distribution of French-speaking classes in all elementary schools:—

Separate and Public Schools

Grade	1938		1939		1940		1941	
	Num-ber	Per-cent	Num-ber	Per-cent	Num-ber	Per-cent	Num-ber	Per-cent
I.....	11,216	23.66	8,955	18.16	8,539	17.12	8,676	17.25
II.....	6,992	14.75	7,148	14.49	7,057	14.15	7,021	13.96
III.....	4,974	10.49	6,631	13.45	6,803	13.64	6,938	13.80
IV.....	5,548	11.71	6,364	12.90	6,541	13.11	6,454	12.84
V.....	5,828	12.30	5,883	11.93	6,043	12.12	6,166	12.26
VI.....	4,775	10.07	5,136	10.41	5,036	10.09	5,226	10.39
VII.....	3,764	7.95	4,018	8.15	4,284	8.58	4,141	8.23
VIII.....	2,913	6.15	3,436	6.97	3,741	7.50	3,902	7.75
IX.....	727	1.52	893	1.81	948	1.90	915	1.82
X.....	443	.93	587	1.19	646	1.29	605	1.20
Auxiliary Classes.....	217	.46	268	.54	251	.50	252	.50
Totals.....	47,397	100.00	49,319	100.00	49,889	100.00	50,296	100.00

A study of the above statistics reveals that: (1) The many repeaters who, before 1939, swelled considerably the enrolment of the Grade I classes, have gradually disappeared; (2) The enrolment in each of the first six Grades of the elementary schools is now almost normal; (3) The percentage of enrolment in the Grade VIII classes has increased from 6.15, in 1938, to 7.75, in 1941.

It is confidently expected, therefore, that, through a continued effort on the part of teachers and inspectors, the enrolment in the Grade VIII classes will attain approximately 10 per cent of the total school enrolment within the next two or three years.

TABLE No. 2

ANALYSIS OF AGE-GRADE DISTRIBUTION IN RELATION TO IDEAL AGE-SPREAD IN ELEMENTARY RURAL AND URBAN SCHOOLS ATTENDED BY FRENCH-SPEAKING PUPILS, MAY 1941

(A) Separate and Public Schools

Grade	Under Ideal Age Spread		Within Ideal Age Spread		Over Ideal Age Spread	
	Number	Per cent	Number	Per cent	Number	Per cent

Auxiliary.....	217	.46	268	.54	251	.50	252	.50

Secondary School Classes

The following table shows the number of French-speaking students enrolled, in December 1941, in the advanced French courses of Collegiate Institutes, High, Continuation, and Vocational Schools under the supervision of the Department of Education:—

Enrolment of French-Speaking Pupils in Secondary Schools in Which Advanced French Courses are Offered, December, 1941

SCHOOL	GRADE					
	IX	X	XI	XII	XIII	Total
Cochrane High.....	9	12	5	3	29
Cornwall Collegiate and Vocational.....	85	23	6	1	115
Embrun High.....	21	30	13	15	6	85
Espanola Continuation.....	15	15
Hawkesbury High.....	46	29	25	17	117
Kapuskaing High.....	25	16	15	2	3	61
Kirkland Lake Collegiate and Vocational...	29	8	3	4	44
Mattawa High.....	10	4	6	4	24
Ottawa Technical.....	68	39	107
Paincourt Continuation.....	10	9	6	9	34
Penetanguishene High.....	21	21	4	2	48
Plantagenet High.....	25	16	19	12	8	80
Rockland High.....	34	22	16	7	1	80
Smooth Rock Falls Continuation.....	17	5	1	23
Sturgeon Falls High.....	38	32	25	25	1	121
Sudbury High and Technical.....	40	23	10	14	4	91
Tilbury High.....	5	4	9
Timmins High and Vocational.....	76	35	17	9	137
Vankleek Hill Collegiate.....	10	8	8	1	2	29
Totals.....	584	336	168	119	32	1,249

NOTE:—The absence of students in the higher grades of some of the above schools is due to the fact that the advanced French courses were just recently established.

This total enrolment of 1,249 French-speaking students in the secondary schools compares favourably with the totals reported for 1938 (839), for 1939 (1,027) and for 1940 (1,102). Indeed, the 1941 total enrolment represents an increase of almost 50 per cent over the 1938 total enrolment. There are besides, some 2,500 French-speaking students who are pursuing their studies in the Grade IX and Grade X classes of the elementary schools, [Table No. 1, (A), (i), of this report], and in private schools. Some of the latter are inspected by the Department of Education for the purpose of accepting, or not accepting, the teachers' recommendations in respect to pupils who are candidates for middle school certificates.

Although much satisfaction is derived from the progress made so far, it is yet evident that much remains to be done throughout the province in order to raise the percentage of the French-speaking secondary school enrolment from the present 6 or 7 per cent to at least 18 or 20 per cent of the total French-speaking school enrolment. Of course, as was stated in previous reports, the main cause of this low and rapidly decreasing enrolment from grade to grade in the secondary schools is to be found and eradicated in the elementary school classes. Once the problem is solved in the elementary department of the school—and according to present indications this task will be completed within the next two or three years—there should be an automatic improvement in the secondary school enrolment and age-grade distribution of pupils.

The appointment, in 1941, of a French-speaking high school inspector has already proved beneficial in improving the general proficiency of the secondary school classes attended by French-speaking students and in promoting a greater desire for higher education among the French-speaking population of Ontario.

Provincial Contest

The finals of the fourth annual provincial contest among the Grade VIII French-speaking pupils were held in Ottawa on April 17th, 1941. Twenty-four contestants—the winning boy and the winning girl from each of the twelve French-speaking inspectorates—took part in this final competition. The four provincial winners, the first two of whom were awarded secondary school scholarships, were as follows:

- 1st boy: Roger Blanchette, 13, St. Joseph School, Sturgeon Falls;
- 1st girl: Rita Mainville, 12, St. Charles School, Timmins;
- 2nd boy: Gilles Petitclerc, 13, St. Jean-Baptiste School, Ottawa;
- 2nd girl: Denise Ralph, 12, St. Conrad School, Ottawa.

The interest aroused by this annual competition is ever increasing. Besides drawing parents and teachers into closer co-operation, the provincial contest encourages the talented pupils to undertake and complete their secondary school education.

Inspectoral District Enterprises

As was stated in a previous report, the French-speaking inspectors were asked, in 1939, to undertake during 1940 and every year thereafter, in their respective inspectorates, one special enterprise bearing on some particular phase of education. It was suggested also that these enterprises, which should aim at correcting a general weakness throughout the inspectorate or at fostering a new and valuable idea in education, be carried on in a scientific manner by taking note of essential data, such as existing conditions at the outset, means employed, difficulties encountered, and results obtained.

Interesting reports were received from the inspectors at the close of the year. Some of the topics for special research in French-speaking inspectorates, during 1941, were as follows: how to improve the pupils' handwriting; group meetings of school trustees and secretaries; the development by pupils and teachers of a Grade I supplementary reader in social studies; how to secure better results in French and English spelling; arousing general interest in the activities of the Ontario Junior Red Cross Society; how to improve the teaching of written composition; the beautification of school properties.

The following excerpts are taken from the report submitted by Inspector J. S. Gratton, of Plantagenet, on: "*The Beautification of School Properties*":—

"Following the receipt, early in March 1941, of "Suggestions for Improvement of Rural School Grounds", issued by the Ontario Department of Education, and "Trees for Schools", issued by the Ontario Forestry Branch, all rural school teachers, members of municipal councils and local Agricultural representatives were invited to co-operate in a school grounds improvement enterprise.

In view of the generous offer of the Forestry Branch to supply young forest trees to schools free of charge, except for transportation, and the offer also of the local Horticultural Societies of the free delivery of shrubs at reduced prices, it was decided that the planting of trees and flowering shrubs should be first undertaken in this campaign.

The accompanying plans, order forms, circulars and correspondence give, better than would a detailed account, an insight into the means adopted to carry out the enterprise successfully.

It is to be noted, however, that of the 16,000 trees distributed, approximately 60% were planted on the school grounds by the pupils in co-operation with the teacher and the school trustees; the others were brought home by the pupils and planted on the farm.

A survey, made during the month of September last, revealed that, despite the very dry spell that followed the planting last May, at least 90% of the trees placed on the school grounds had survived the excessive drought and were doing well. The willingness and enthusiasm with which both teachers and pupils cared for the young trees after they were planted largely account for this success."

The successful enterprise described above by Inspector Gratton will doubtless serve as a powerful incentive in some of the other inspectorates.

"L'Association de l'Enseignement français de l'Ontario"

After one year of successful operation, this provincial association of French-speaking teachers and inspectors held its second annual convention in Ottawa on April 17th, 18th and 19th, 1941. Mr. Omer Brûlé, B.A., of the Ottawa Technical School teaching staff, was elected president for the year 1941-42.

This association, as was stated in last year's report, comprises three sections and is composed of French-speaking elementary and secondary school teachers, inspectors and normal school masters of Ontario. It resembles closely, on a smaller scale, the Ontario Educational Association, and, in co-operation with the latter, will no doubt promote the best interests of French education in this province.

Correspondence Courses in French

In view of the fact that approximately 10 per cent of the pupils enrolled in the Departmental correspondence courses are French-speaking, and in response to several requests which were received from interested families, the Minister decided, in the autumn of 1941, to include in this service the same courses and examinations which are provided for French-speaking pupils in the public and separate schools of the province. An experienced and successful French-speaking teacher, Miss Hélène Lacasse, was appointed to the correspondence school staff in the Department and the preparation of these new courses was undertaken.

In September 1942, the Grade I courses for French-speaking pupils will be ready for distribution, and it is expected that from year to year the programme

of the next Grade will be added until the full elementary school course will have been developed.

This is by no means an easy task. However, it is confidently expected that by following the splendid system already established for English-speaking pupils, and with the co-operation of the French-speaking normal school masters, inspectors and teachers, the results will constitute an achievement worthy of note in the field of French and English education.

ROBERT GAUTHIER,
Director of French Instruction.

Toronto, June 30th, 1942.

APPENDIX E

REPORT OF THE INSPECTOR OF AGRICULTURAL CLASSES

Present Status of Instruction in Agriculture

Agricultural instruction is now well established in the elementary schools of Ontario. The optional courses in Agriculture for Grades VII and VIII are taught in approximately half the schools while agricultural topics of the courses in Science for these grades and of Natural Science for lower grades are taken in many others. The value and importance of instruction in agricultural topics is now recognized and approved by the majority of trustees and parents. Inspectors of Public and Separate Schools are giving every encouragement and in many inspectorates the subject is being taught in all schools. The depth and effectiveness of the instruction is limited only by the qualifications and zeal of the teachers. Unfortunately the number of qualified teachers is being reduced because of the entry of many teachers into various branches of the war effort and the discontinuance of Summer Courses. Effective courses of instruction are being given at the Normal Schools and many teachers without special agricultural certificates are doing excellent work. The programme for "Improvement of Rural School Grounds" has, in many instances, provided an interest and activity which has enlisted the co-operation of trustees, parents, teachers and pupils. It has indeed made the school property a centre of interest in the community.

During the past ten years there has been a marked increase in interest in agricultural instruction in secondary schools. In present courses agricultural topics are combined with essential science topics giving a course which meets the requirements in Science for normal school entrance and pass matriculation. Cordial support of these courses is now voiced by trustees and parents. The number of schools in which the work is taken is limited only by the number of teachers available. Boards are anxious to continue the instruction and when qualified teachers leave, they make strong efforts to secure qualified teachers or those who, because of experience and aptitude, may be granted temporary certificates. The entry of many of these qualified teachers into various war services has had its effect. It is necessary to recognize that the courses in Agricultural Science for Grades IX, X, XI and XII give only a limited time for agricultural topics. Special or extended study of individual topics is seldom feasible for any pupil or group of pupils. Practical work in gardening, fruit growing, poultry and beekeeping is possible and one or all are taken in many schools. The knowledge gained from these general courses is of value to all pupils and of particular value to those who may later engage in farming. In only twelve of the 168 schools in which Agriculture is taught have special courses been provided for pupils who expect to farm. In these schools a reasonable proportion of students are enrolled in these courses which are being successfully conducted.

Unfortunately, in Ontario only a limited number of pupils who are completing Grade VIII or entering secondary school expect to become farmers. This is true

of children of farmers as well as children of others. Commercial and industrial occupations have so great an attraction that it has been difficult to introduce courses in Agriculture, apart from the Regular normal entrance and pass matriculation courses. While the objective of pupils on entering the secondary school is generally away from the farm, records show that many who drop out during the first two or three years eventually find employment on the farm. A change of viewpoint on the part of parents and others is needed so that farming may be rated on a par with commerce and industry in the national economy. It must also be recognized that with the present equipment and teachers much that is of value in practical Agriculture may be taught during the school life of the pupil. The scarcity of farm labour has drawn thousands of pupils from secondary schools to help on farms during the summer. Many of these pupils are from urban schools. They will doubtless find farm activities interesting and gain an understanding of various farm operations. The importance of production of food materials as a part of the war effort is being stressed in every quarter. Thus present day pupils should understand fully the importance of agriculture to individual and national welfare. The recognition of this should arouse, in a larger number of pupils, a keen interest in farming as a future vocation. In the very near future there should be a greater demand for definite vocational agricultural courses linked with summer employment on the farm to provide a suitable training for those who will eventually become farmers.

Elementary Schools

Information received for the school year ending June 30th, 1941, indicates that interest in agricultural instruction and related activities is being well maintained under present conditions. Agricultural courses for Grades VII and VIII were taught in 4,291 schools of which 359 were urban. Reports claiming grants as refunds of expenditure were received from 2,784 schools. The courses for Grades IX and X were taught in 327 schools.

The courses as outlined for Grades VII and VIII cover various agricultural topics and the Regulations require that four of nine suggested activities must be conducted. One of these, "Improvements of School Grounds" has received special attention during the year. Under the direction of the inspectors and with the co-operation of officials of the Departments of Agriculture and Forestry, and the assistance of members of Horticultural Associations, trustees, teachers and pupils have made a marked improvement in the appearance of school grounds in many inspectorates. Particular attention has been given to schools located on main highways. Improvements made include new fences or old ones repaired, better care of the school grounds during the summer, planting shrubs, trees and flowers. In some cases the grounds have been levelled and re-seeded. Good progress has been made in the second year of this effort in spite of war conditions. School gardens number 1,129, a reduction as compared with last year. In many schools the attention formerly given to the school garden is being given now to improvement of the grounds.

The scope and effectiveness of the instruction varies greatly and is dependent on the interest and knowledge of the teacher and on the attitude and co-operation of the trustees and members of the community. The number of certificated teachers for 1940-41 was 2,303 as compared with 2,943 in the previous year. This reduction is largely accounted for by the fact that there have been no summer courses during the past two years.

BEAUTY FOR RURAL SCHOOLS

Courtesy Ontario Department of Agriculture

S.S. 11, Amabel, Sauble Falls, Bruce County

Winner of the 1941-42 School Ground Competition of the Ontario Horticultural Association in which some 250 rural schools took part.

This award is given, not for total beauty, but for the improvement made during the year. The score card lists clean-up, repairs, paint, lawns and playgrounds, new planting, weeding, and general care.

School Fairs were conducted in a number of inspectorates either as separate fairs under local committees of teachers and other interested parties or in conjunction with fall fairs. In several of the northern inspectorates the school fair programme has been carried on very effectively with only a small reduction in the number of fairs as compared with two years ago.

Secondary Schools

In the autumn of 1941 Agricultural Science was taught in 27 Collegiate Institutes, 82 High Schools and 59 Continuation Schools, a total of 168. The subject was introduced in two Continuation Schools and discontinued in two High Schools and one Continuation School because of change of teachers and in one Continuation School which was closed. Both Lower and Middle School courses are taught in 126 schools, an increase of one over last year. The Middle School courses in Agricultural Science are valid for Middle School Science requirements for entrance to Normal Schools, University Courses and Training Schools for Nursing.

The number of teachers employed was 213 of whom 122 held the Specialist Certificate in Agriculture and 91 were graduates of the Ontario Agricultural College. Because of enlistments, smaller classes in the Specialist Courses at the College of Education, and discontinuance of summer courses in Agriculture, there was a scarcity of qualified teachers and temporary certificates were issued for teachers in two Collegiate Institutes, one High School and seven Continuation Schools.

The courses followed are those of Grades IX, X, XI and XII in which agricultural topics are taken with essential topics in Science. All schools are now well equipped for practical work in the various agricultural topics which are taught in the classroom or laboratory. School gardens are maintained in 152 schools and students have practice in planting and care of vegetables and flowers. Fruit trees and small fruits have been planted in many gardens and on larger areas a three-year crop rotation is followed. Small poultry houses have been provided at 14 schools. Chicks are raised in the spring, fowl fattened in the fall and laying stock kept through the winter months in most of these buildings. One or more colonies of bees are kept at 18 schools and instruction in this subject is practical. Frequently students start beekeeping at home as a result of instruction at school. Greater attention is being given to productive home projects and in many schools students are rearing chickens, keeping records of egg and milk production and growing farm crops at home. Many students are members of various clubs conducted by the Agricultural Representatives. Growing of vegetables for home use is being stressed as a desirable home project for the coming year.

Agricultural Departments under the High Schools Act are maintained at Drayton, Elmira, Listowel, Port Perry, Whitby and Wheatley and under the Vocational Education Act at Beamsville, Kemptville, Simcoe, Stamford, Renfrew and Ridgetown. The courses in Agricultural Science are taught in these schools, and additional time is provided for Agriculture and greater stress given to practical applications than in other schools. Good work is being done in all these departments.

The subsequent paragraphs of this report give statistics and comments relative to the progress of agricultural instruction in elementary schools, secondary schools, summer schools and the normal schools.

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4
1914.....	264	208	56
1928.....	3,395	1,059	2,336
1937.....	5,065	1,580	3,485
1940.....	3,879	1,446	2,433
1941.....	4,291	1,129	(indefinite)

Figures prior to 1941 are based on the number of schools qualifying for grants. For 1941 the figure covers the schools where the courses were taught. Grants were claimed for 2,784 of these schools.

The following table shows the certificates held by teachers engaged in the work for the years given:

Year	Elementary	Elementary Part I	Intermediate	Intermediate Part I	Totals
1934.....	1,552	86	144	10	1,792
1936.....	2,092	208	188	22	2,510
1938.....	2,864	444	259	52	3,619
1939.....	3,132	238	312	33	3,715
1940.....	2,508	112	307	16	2,943
1941.....	1,956	94	236	17	2,303

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in fifth classes of 327 schools under the Regulations for Public and Separate Schools. The Lower School courses taught by a teacher holding an Intermediate Certificate are taken under the High School Regulations in the following schools: Elizabeth Ziegler Public School, Waterloo; Mono Mills Public School; St. Andrew's West Separate School; St. Raphael's West Separate School; Victoria Public School, Kitchener; Toronto Public Schools: Brown, General Mercer, McMurrich, Perth Avenue.

Secondary Schools

Instruction in Agriculture in secondary schools is provided under three schemes as stated below and may be taken in those schools which meet the requirements of the Department of Education.

1. Optional classes in Lower and Middle School as a part of the course for Normal Entrance or Matriculation.
2. Department of Agriculture under the High Schools Act.
3. Department of Agriculture under the Vocational Education Act.

Under scheme (1) above, Agriculture was taught during the year in the schools listed below. Under (a) are the schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses.

Collegiate Institutes

(a) Clinton, Cornwall, Goderich, Ingersoll, Kitchener, Oshawa, Perth, Seaforth, York Memorial, Vaughan Road. Total 10.

(b) Barrie, Belleville, Brockville, Cobourg, East York, Fort William, Lindsay, Napanee, Orillia, Picton, Port Arthur, Renfrew, Runnymede, Scarborough, Smith's Falls, Stamford, Strathroy. Total 17.

High Schools

(a) Bracebridge, Cobalt, Durham, Englehart, Essex, Markham, Marmora, Mattawa, Maxville, Meaford, Merritton, Mount Forest, Newcastle, Niagara, Orangeville, Port Credit, Tilbury. Total 17.

(b) Alexandria, Alliston, Amherstburg, Arthur, Athens, Beamsville, Blenheim, Bowmanville, Brighton, Burford, Burlington, Caledonia, Cayuga, Chesterville, Dundas, Dunnville, Elmira, Fergus, Forest, Grimsby, Hagersville, Haileybury, Harrow, Havelock, Iroquois, Kemptville, Kincardine, Kingsville, Lakefield, Leamington, Listowel, Lucan, Madoc, Markdale, Midland, Milton, Mitchell, Morewood, Nepean, Newburgh, New Liskeard, Norwich, Norwood, Oakville, Omemee, Petrolia, Port Elgin, Port Perry, Ridgetown, Saltfleet, Shelburne, Simcoe, Smithville, Stirling, Streetsville, Sydenham, Trenton, Tweed, Uxbridge, Waterdown, Waterford, Watford, Whitby, Williamstown, Winchester. Total 65.

Continuation Schools

(a) Ailsa Craig, Arkona, Bothwell, Burk's Falls, Chatsworth, Coldwater, Eganville, Elgin, Forester's Falls, Forest Hill Village, Grand Valley, *Hepworth, Minesing, Richard's Landing, *Seeley's Bay. Total 15.

(b) Agincourt, Ayr, Beaverton, Brooklin, Brownsville, Comber, Drayton, Drumbo, Embro, Florence, Fordwich, Ilderton, Inglewood, Little Britain, Lobo, Lynden, Lyndhurst, Melbourne, Merlin, Merrickville, Milverton, Mindemoya, Mount Albert, Mount Brydges, Mount Elgin, Mount Pleasant, New Dundee, New Hamburg, Orono, Pelham, Port McNicoll, Princeton, Russell, St. George, Sparta, Stevensville, Sundridge, Tamworth, Teeswater, Thamesford, Thamesville, Tiverton, Wheatley, Woodville. Total 44.

A summary of the above shows that Agriculture is now taken in twenty-seven Collegiate Institutes, eighty-two High Schools and fifty-nine Continuation Schools, a total of 168. During the year the work was introduced in two Continuation Schools and was discontinued in two High Schools, and two Continuation Schools. Both Lower and Middle School courses are taken in one hundred and twenty-six schools.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913 and the number of schools now taking the work.

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....		1	1	2
1918.....	8	13	4	25
1928.....	14	44	23	81
1933.....	24	54	33	111
1940.....	27	84	59	170
1941.....	27	82	59	168

*Introduced Agriculture in September, 1941.

Two hundred and thirteen teachers are engaged in giving instruction in Agriculture. Of this number, one hundred and twenty-two hold the Specialist Certificate, ninety-one being graduates of the Ontario Agricultural College. Ten teachers have been granted temporary certificates.

The following schools are taking work under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Port Perry, Wheatley and Whitby. Additional time is given to Agriculture and practical phases of the subject are stressed. At Elmira, Port Perry and Whitby provision is made for Shop Work for boys and Home Economics for girls.

Under (3) above, the following schools are qualifying for grants under the Vocational Education Act: Beamsville, Kemptville, Renfrew, Ridgetown, Stamford and Simcoe. In all, provision is made for instruction in Shop Work and in all except Stamford for Home Economics. The regular courses in these subjects, with special emphasis on agricultural applications, are being followed. In all centres practical applications of agricultural topics are stressed, a regular programme of home project activities is conducted and the teachers visit the homes of pupils to inspect the projects undertaken.

Normal Schools

There have been no material changes in the Normal School course in Agriculture. Except in the University of Ottawa Normal School, instruction in Agriculture is a part of the regular course and the subject is taken by all students. Students who have taken four years of Agriculture in an approved school during their Secondary School course are granted an Interim Elementary Certificate on successfully completing the Normal School course. Others must attend summer school to secure a certificate in Agriculture.

Facilities for instruction in practical phases of gardening and other topics are provided, the instructors are all qualified in Agriculture and a good course is given as far as the time allotment on the Normal School programme will allow.

NORMAN DAVIES,

Inspector of Agricultural Classes.

Toronto, August 14th, 1942.

APPENDIX F

REPORT OF THE INSPECTOR OF AUXILIARY CLASSES

Teachers' War Service

Miss Jean Hampson of the Wellesley Orthopaedic School, and demonstrator in Occupational Therapy for the University of Toronto, has been appointed Director of Occupational Therapy and Supervisor of Instruction in Occupational Therapy at the Astley Ainslie Institute, Edinburgh, Scotland. This appointment was made by the Board of Health for Scotland.

Mr. C. Elliot and Mr. W. D. Royle of the Church Street School for Boys and Mr. Elgin Fretz of the Kitchener Boys' Handicraft Class are serving in the Royal Canadian Air Force. Mr. George Charlton of Kitchener Boys' Handicraft Class, Mr. Kenneth Marsh, Drew School, Fort William, Mr. Charles Eldert of Wellington School, St. Thomas, Mr. R. Carter of Chatham Boys' Handicraft Class, Mr. D. C. Warren of the Smith's Falls Handicraft Class are serving with the Canadian Army. Mr. F. W. Palmer and Mr. A. M. Patterson of Church Street School are giving instruction to the War Training Classes.

Pupils' War Work and Service

The war has affected the instruction in handwork. The knitting of afghans, mufflers, sweaters, socks and mittens is a standard feature in all mixed classes. The mufflers, sweaters, socks and mittens have met the specifications and standards of the Red Cross Society. Layettes are made by senior girls. Ditty bags for soldiers and sailors and shelter bags for those bombed out have been made, filled and forwarded to the regular depots. Sewing of quilts and dresses has a greater appeal when it is known that the product goes to people in the war areas.

The boys at the Church Street School, Toronto, have made several hundred wood and metal leg-splints with materials donated by the Red Cross Society. At Warren Park Handicraft School the pupils made scale-models of aeroplanes which were accepted by an R.C.A.F. Wireless School for Training airmen in spotting.

Collections for the Junior Red Cross and the methodical purchase of War Savings Certificates have a regular place in the programme.

Graduates of the Handicraft Classes have enlisted in the armed forces in considerable numbers. Mr. H. O. Lydford's Handicraft Class in North Bay is a sample. This class has been in operation ten years. As of December 1941, the record of this class is that forty-seven graduates have enlisted in the infantry, ordnance and the engineers. One graduate is a sergeant of engineers while another is a corporal of signals.

Teacher Supply

Military and war service has affected the supply of teachers. In replacing the nine teachers on active and war service, it was necessary to appoint four teachers without training in auxiliary work.

In the city of Toronto the retirement or marriage of fourteen teachers resulted in temporary closing of eight Opportunity Classes. One of the Toronto classes is in charge of a teacher without the usual special training.

In other schools the promotion of the teacher of the Opportunity or Handicraft Class has resulted in the employment of certificated teachers without special training.

In all, twenty-seven teachers were granted temporary certificates valid for one year and limited to a particular class.

Urban Organization

A survey was conducted in Brockville as a preliminary to the establishment of the Boys' Handicraft Class. New Opportunity Classes were opened in MacDonald School, Kingston; Ryerson School, Brantford; Prince of Wales School, Hamilton; Holy Name School, Toronto. Handicraft Classes were established in Victoria School, Windsor; Central School, Brockville, and in Kitchener School, Niagara Falls.

Due to retirements, marriage and war service, and the reduction in the number of candidates for the classes, twenty-three classes were closed as follows:—

Opportunity Classes—St. Michael's School, Belleville; Grimsby Public School; Hespeler Public School; Preston Separate School; Kitchener School, Niagara Falls; Balaclava School, St. Thomas; Myrtle St. School, St. Thomas; S.S. No. 6 Stamford; Bruce School, Toronto; Earl Grey School, Toronto; Gledhill School, Toronto; Leslie School, Toronto; Orde School, Toronto; Roden School, Toronto; Sackville School, Toronto; Wellesley School, Toronto.

Handicraft Classes—St. Francis School, Ottawa; Shakespeare School, Stratford; Ealing School, London; Victoria School, Kitchener (2 classes).

Sanatorium Classes—Freeport Sanatorium, Kitchener; Brant Sanatorium, Brantford.

The closing of classes in London, Kitchener and St. Thomas is directly attributable to military or war service. The Belleville and Preston Separate School classes are being continued on the same plan as is provided for Auxiliary Units in rural schools. In S.S. No. 6 Stamford, more space was required due to the influx of the families of war workers. In Niagara Falls, the Opportunity Class was closed and a Handicraft Class established.

Rural Organization

Surveys of the following rural inspectorates were carried out by Miss DeLaporte and myself in conjunction with the inspectors concerned.

Inspectorate	Inspector	Number of cases
*Bruce East, Grey (part), Huron (part).....	J. M. Game.....	108
†Grey North and Bruce North.....	J. J. Wilkinson.....	13
Halton.....	L. L. Skuce.....	70
†Hastings South.....	J. R. Pickering.....	13
Huron North.....	J. H. Kinkad.....	41
Leeds and Grenville No. 2.....	E. Oakes.....	93
†Ontario South.....	R. A. Hutchison.....	14
Peterborough East.....	L. W. Copp.....	105
†Renfrew North.....	N. Campbell.....	17
†Wendland (part), Lincoln (part).....	W. A. Marshall.....	13
†Wendland South.....	N. R. Wightman.....	22
*District Division VI.....	W. MacMillan.....	112
District Division VII (1).....	O. M. MacKillop.....	65
District Division VIII (1).....	J. W. Trusler.....	96
District Division XIV.....	E. R. Underhill.....	49
R.C. District Division XVII.....	C. P. Matthews.....	100

*Second survey.

†Partial survey.

In all, 931 pupils were examined and advisements made concerning their educational welfare. Through the co-operation of the local Inspector and the several school boards, special educational facilities have been provided for the large majority of those who were found to stand in need of assistance. Up to the present time fifty-one rural inspectorates have been completely and eighteen others partially surveyed and organized. Of the fifty-one rural inspectorates which have had complete surveys in the past, six have had the survey repeated after a period of four, five or six years. The areas which have had a second survey have shown at the end of a five-year period as great a number of pupils as the original survey.

There are 118 Home Instruction Units, 51 Sight Saving Units, 8 Transportation Units and 842 Opportunity Units reported for grants. A larger number of Opportunity Units exist but have not reported expenditures for the current year. The number of Sight Saving Units is unusually small this year. This may be due to the fact that it is more difficult to import books printed in 24 point type, especially for this purpose.

Reports from inspectors and teachers show that upwards of 50 per cent. of the pupils in Opportunity Units are re-adjusted to grade work; that the establishment of Sight Saving Units enables pupils suffering from defective vision to maintain normal grade progress; and that the provision of a Visiting Teacher for home-bound sick and crippled children has equally beneficial results.

Sight Saving Books

Since the war, the purchase of large-type books for pupils in Sight Saving Classes and Units has declined considerably. Foreign exchange costs have increased the prices of imported books to the point where their cost exceeds the maximum amount of the reimbursement grant.

To offset the greatly reduced supply of imported books, and to provide the texts based on the Ontario Course of Study, the Treasury Reader Grade V (Part I) has been duplicated on the magnatype typewriter under permission from the publishers, the Macmillan Company of Canada, and the Ryerson Press. Four Sight Saving teachers of Toronto have prepared a Workbook, Social Studies Grade VI, which has been duplicated on the typewriter with the permission of the authors.

At the present time magnatyped reading material is available for Grades I, III, IV and VIII without charge to pupils who require Sight Saving instruction. There is an adequate supply of Ontario Spellers for all grades and sufficient Social Studies workbooks for Grades V and VI.

To provide magnatyped reading materials, a graded list of books in 18 point, 24 point, 36 point and 72 point type was made in December, giving the name of the publisher, the type size and the title. This list shows where Supplementary reading materials may be found for Grades II, VI and VII, for which free books are not yet available. These lists have been provided to all inspectors and to all teachers of Sight Saving Classes.

Miss Louise E. Rush, Senior Sight Saving teacher of the Toronto Public Schools, resigned after having given sixteen years' service to this important branch of Auxiliary work. Miss Rush was appointed to the Orde Street School class in 1925. In 1932 the class was transferred to Hester How School where Miss Rush taught pupils of Grades VII, VIII, IX and X, until her retirement in June 1941. Miss Rush was a pioneer in Sight Saving instruction and was frequently employed as an instructor at teachers' summer courses at Columbia University.

Multiple Handicaps

Experience in teaching pupils who fail at school shows that failure is not often due to one single cause, deficiency, handicap or disability, but that it is a result of a combination of factors. To provide data on the handicaps of their pupils, all special class teachers were asked to make out a class summary in September 1941, to show the actual rating of their pupils in Reading, Arithmetic and Crafts in comparison with the estimate of the progress which would be expected at the individual pupil's mental age. Under "Remarks" the teachers listed physical handicaps from the A. D. P. cards on the medical reports.

A report on a part of the data is possible because in December 1941, nine hundred and nine pupils had been reported by 46 teachers of various types of Auxiliary classes. Their handicaps were classified as Reading, Speech, Visual, Hearing, Lowered Vitality, Orthopaedic, Cardiac, Anti-Social Behaviour, Emotional Instability and Economic Deficiency. The terms used in this survey describing academic ability are as follows:

- (1) Superior refers to pupils who could pass the High School Entrance Examination at age 12 to 13;
- (2) Average indicates pupils who could pass the Entrance at 13 years 6 months to 14 years 6 months;
- (3) Slow Learner is the term used for pupils who could pass the Entrance at 15 or 16 years;
- (4) Retarded means those pupils who could not be expected to go beyond Grade VI in the elementary school.

Three tables have been prepared from these data,—

1. Summary of All Reported Handicaps.
2. Summary of Reported Physical Handicaps.
3. Classification of Pupils according to Academic Capacities.

Summary of Reported Handicaps of 909 Auxiliary Class Pupils

Number of Handicaps	Number of Pupils	Per cent.
1.....	205	22.6
2.....	476	52.4
3.....	202	22.2
4.....	22	2.4
5.....	4	.4
Total.....	909	100.

Summary of Reported Physical Handicaps of 909 Auxiliary Class Pupils

Handicap	Number of Pupils	Per cent.
Speech.....	73	8.0
Visual.....	36	4.0
Hearing.....	29	3.2
Orthopaedic.....	16	1.8
Lowered Vitality.....	233	25.6
Cardiac.....	2	.2
Total.....	389	42.8

Classification of 909 Auxiliary Class Pupils According to Academic Capacities

	Number	Per cent.
Superior.....	6	0.6
Average.....	228	25.1
Slow Learners.....	316	34.8
Retarded.....	359	39.5
Total.....	909	100.

The facts stated in the summary bear out the general experience that most pupils in need of special methods, materials and instruction have more than one handicap, and that 42.8% of the pupils are physically handicapped. Over 90% of these pupils are retarded in Reading. The data indicate that 60% of this limited group might pass the High School Entrance examination before they reach the school leaving age if their handicaps could be overcome. They also support the statement on page 47 of the 1937 Report of the Minister of Education, that there will be an increased placement in Auxiliary classes of "... children who ... have failed to acquire the art of reading, but may, after a certain period of special training, be returned to the classes for slow but profitable grade progress". More pupils are being admitted for readjustment and ultimate return to the grade. This group is a partial sampling of nearly all types of Auxiliary classes and the exact percentages may vary widely when all Auxiliary pupils are included. The survey is being continued.

The Use of Class Hearing Aids

In Rosedale School, Toronto, a Class Hearing Aid has been in use for some years. Experience with this machine has demonstrated that speech can be taught better to hard of hearing pupils with the machine than without it.

The Ottawa Public School Board installed a completely Canadian-built Class Hearing Aid in the Oral and Hard-of-Hearing Class under Miss Stirk at Cambridge Street School.

At Ogden School, Toronto, Miss Ruth Miller, teacher of the Hard-of-Hearing Class, in association with Mr. Clair Maedel, principal and Mr. H. B. Henshaw, caretaker of the same school, built a class Hearing Aid, using an existing school radio receiver and microphone and additional materials on which about ten dollars (\$10.00) was spent.

In all three of these classes the tone and quality of the speech is definitely superior to that of classes where the hearing aid is not used. In the Ogden School, phonograph records of the voices of all hard-of-hearing pupils were made in March 1941, in order that their progress may be studied. In December a comparison of the pupils' voices with the phonograph record showed that high-pitched voices had been lowered noticeably and that certain letter substitutions had been corrected in the intervening six months. It is planned to record the voices of the pupils of the Ogden hard-of-hearing class in March 1942. Such records will be extremely valuable in judging the progress of the pupils and in the training of teachers of Speech Correction.

Auxiliary Organizations

(a) Brief courses were given in each of the Normal Schools to acquaint teachers-in-training with methods of dealing with handicapped slow-learning and retarded pupils, especially with those in the rural schools. The many com-

munications received by the Department from recently graduated teachers concerning exceptional children in their charge is ample proof of the interest created in the welfare of handicapped children by these Normal School lectures.

(b) The Auxiliary Class Section of the 1941 O.E.A. was well attended, and a number of Ontario representatives took part in the 1941 Convention of the International Council of Exceptional Children held in New York City. Both meetings were productive of renewed enthusiasm for this work.

(c) "The Special Class Teacher", a magazine devoted to the interests of special education and published by the Auxiliary Class Section of the O.E.A., continues successfully to publish and distribute interesting articles and valuable suggestions contributed by auxiliary class teachers throughout the Province.

(d) The Summer Course in Auxiliary Education was not given this year. Eleven teachers pursued studies in various universities to improve their professional knowledge. Four attended summer courses at Columbia University and the University of Michigan. Five attended summer courses in Ontario Universities and two completed their trade training by taking positions in industry. Two teachers were employed as lecturers in the summer courses at Columbia University.

C. E. STOTHERS,

Inspector of Auxiliary Classes.

Toronto, April 15th, 1942.

APPENDIX G

REPORT OF THE DIRECTOR OF SCHOOL ATTENDANCE

The effects of war are many and varied. As men enter the various branches of the service there are opened up for others the positions left vacant by them. The result is that thousands of women and adolescents are now engaged in industrial occupations who previously were unemployed. Then, too, we have not yet completely recovered from the ill effects of the years of depression. These two conditions account to a great extent for the decrease in school enrolment as shown in the comparative table below.

Table No. 1—Enrolment

	1938-39	1939-40	1940-41	Increase or Decrease
Public Schools	453,182	441,143	433,597	7,546 decr.
Separate Schools	104,466	102,180	100,317	1,863 decr.
High Schools and Collegiate Institutes	72,247	73,102	67,391	5,711 decr.
Continuation Schools	9,866	10,048	9,202	846 decr.
Vocational and Special Industrial Schools—				
Day Classes	35,779	37,900	33,082	4,818 decr.
Night Classes	36,481	34,983	31,848	3,135 decr.
	712,021	699,356	675,437	23,919 decr.

The number of teachers employed in the Elementary schools decreased from 18,046 to 17,954, a difference of 94. The number of schools, however, increased, despite the fact that because of small attendance a number of schools were closed; the Public Schools from 6,485 to 6,528, a difference of 43 and the Separate Schools from 859 to 872, a difference of 13. When schools are closed the pupils are transported to neighbouring schools where they have the advantage of better equipment and a larger social environment.

Table No. 2—Percentage Attendance

Class of School	1936-37	1937-38	1938-39	1939-40	1940-41
City Schools	92.49	92.96	91.5	92.8	92.5
Town Schools	92.67	93.08	92.2	93.3	92.5
Village Schools	91.83	91.95	91.0	92.7	
County Rural Schools	87.65	88.77	89.6	90.3	89.3
District Rural Schools	87.22	86.85	87.4	89.9	
All Urban Schools	92.49	92.92	91.6	93.0	92.5
All Rural Schools	89.34	89.13	88.0	90.2	89.3
All Elementary Schools	90.91	91.51	90.3	91.9	91.3

The 1940-41 term, although lower than the 1939-40 term, the best yet, compares favourably with the others.

School Leaders in Attendance

Of the cities, Galt with 95.3% and Kitchener with 93% were the leaders in percentage attendance. The towns and villages of Brant County had a percentage of 96. Thunder Bay was the District leader, also with 96%. Among the county rural schools, Russell County with 92.3% and Waterloo County with 92.2% stood first in percentage attendance. When the urban and the rural attendances were combined, Waterloo County, with 94.5%, and Wentworth, with 92.7%, were the leaders among the counties, and Sudbury, with 92.5%, and Cochrane, with 92%, among the Provisional Districts.

Table No. 3—Public School Attendance

	1939-40		Days Lost per Pupil	1940-41		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	160,911	90.0	18.9	154,654	89.1	20.5
Urban.....	236,285	92.7	14.1	231,064	92.3	14.6

Table No. 4—Separate School Attendance

	1939-40		Days Lost per Pupil	1940-41		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	21,753	91.6	16.0	21,510	91.0	16.7
Urban.....	72,906	93.7	12.4	71,398	93.2	13.1

Table No. 5—Totals

(Tables 3 and 4 combined)

	1939-40		Days Lost per Pupil	1940-41		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	182,664	90.2	18.5	176,164	89.3	20.1
Urban.....	309,191	93.0	13.7	302,462	92.5	14.3

Table No. 6—All Elementary Schools

	1939-40		Days Lost per Pupil	1940-41		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	397,196	91.6	16.1	385,718	91.0	17.0
Urban.....	94,659	93.1	13.2	92,908	92.7	13.9

The percentage attendance for all elementary schools was 91.3 and the average loss per pupil was 16.4 days.

Table No. 7—Absence in Elementary Schools

Days lost through	1940-41	Percentage Loss			
		1937-38	1938-39	1939-40	1940-41
Illness.....	5,708,490	62.39	66.99	65.85	65.20
Home Help.....	941,804	9.91	7.79	9.86	10.76
Parental Neglect.....	624,902	6.95	6.06	6.98	7.14
Physical Obstacles.....	344,038	3.81	4.56	3.75	3.93
Truancy.....	30,760	.32	.24	.32	.35
Privation.....	67,116	1.04	1.04	1.06	.77
Irregular Closing.....	545,615	5.85	6.67	6.06	6.23
Other Reasons.....	492,133	9.73	6.65	6.12	5.62
Total days lost.....		8,734,593	9,983,079	8,403,488	8,754,858
The above losses are classified—					
Lawful.....		6,329,014	7,680,348	6,327,689	6,529,268
Unlawful.....		2,405,579	2,302,731	2,075,799	2,225,590
Percentage attendance.....		91.5	90.3	91.9	91.3

An analysis of the above table brings out some interesting facts. The effects of the war are shown in the shortage of help, principally in the rural communities where the percentage loss through home help has risen almost one per cent. Where the heads of the families are both engaged in war or army work there is not the same supervision of the family, with the inevitable result of increased losses due to parental neglect and truancy. On the other hand the increased earnings are reflected in the improvement of conditions, as indicated in the column marked "Privation". In the previous year 88,834 days were lost, this year 67,116, a decrease of 21,718 days. Severe storms lasting several days, in different parts of the Province, increased the loss due to physical obstacles. This is reflected also in the loss under irregular closing, as many schools were closed for a day or two because of weather and road conditions. In such cases the loss is unavoidable. There are times, however, when schools are closed for minor reasons that might have been avoided. Some Boards apparently do not realize that they have no authority to close a school and if they do, they lose the attendance grant that they might, otherwise, have earned.

Table No. 8—Summary of Attendance Officers' Reports

	1938	1939	1940
School Children's Employment Certificates Issued.....	350	710	1,343
Home Permits Issued.....	1,730	1,389	1,885
Employment Certificates Issued.....	1,907	2,146	4,871
Cases brought before Magistrates.....	527	528	614

Under the School Attendance Act and the Adolescent School Attendance Act ample provision has been made to enable pupils in urgent cases to leave school before the legal retiring age. Each case is carefully examined and if, in the opinion of the Attendance Officer, it merits special consideration, then the necessary permit or certificate is issued.

Table No. 9—Secondary Schools

Schools	No. of schools	No. of teachers	Enrolment		Percentage Attendance	
			1939-40	1940-41	1939-40	1940-41
High Schools and Collegiates	230	2,855	73,102	67,391	94.6	93.5
Continuation Schools	203	587	10,048	9,202	91.4	92.3
Vocational and Special Industrial Schools	64	1,751			*94.0	*92.1
Day			37,900	33,082		
Night			34,983	31,848		
			72,883	64,930		
	497	5,193	156,033	141,523		

*Day Classes only.

The general trend of decreased enrolment is shown also in the secondary schools, where there were 14,510 fewer pupils, all types of schools sharing the loss. Senior pupils in large numbers have volunteered for war services, either in the armed forces or in industries directly related to the war effort.

R. D. KEEFE,
Director of School Attendance.

Toronto, August 10th, 1942.

APPENDIX H

REPORT OF THE SUPERINTENDENT OF THE ONTARIO SCHOOL FOR THE DEAF

I have the honour to submit the Annual Report of the Ontario School for the Deaf for the year ending March 31st, 1942.

Attendance

Enrolment by months:—

	Boys	Girls	Total
April, 1941.....	149	158	307
May.....	149	156	305
June.....	149	156	305

Moving to Belleville

From 1870 to 1941, the Ontario School for the Deaf had been situated in buildings and grounds located two miles west of the City of Belleville. During that time 3,353 deaf children had been educated and trained for life.

In July 1941, the Department of National Defence for the Dominion of Canada, requested the Province of Ontario to grant to the Royal Canadian Air Force the use of these buildings and grounds for the duration of the war, and in August 1941, the R.C.A.F. opened No. 5 Initial Training School on our former site.

Before the end of August, plans were completed for the transfer of the School for the Deaf to buildings in Belleville, rented for the duration of the war. As it was not possible to get possession of all buildings at once, it was necessary to move school furniture, beds and other equipment to temporary storage, making a second moving necessary when buildings became available. Considering these difficulties, and the necessary renovation of buildings, we were fortunate in being able to open school on October 15th, one month later than the usual date.

By renting six houses, and obtaining the use of the Parish Hall of St. Thomas Anglican Church, and a building owned by the Dominion of Canada, it has been possible to obtain sufficient accommodation for classrooms, dormitories, and dining-rooms.

As it was not possible to accommodate all pupils in Belleville, it was necessary to limit admission to classes in Belleville to those under sixteen years of age, and also to open day classes in four of the large cities, viz. Toronto, Hamilton, London and Windsor. To the day classes, not only pupils between 5 and 16 years of age are admitted, but in Toronto, Hamilton and London, pupils between sixteen years and twenty-one years of age are also admitted. If these older pupils live outside the boundaries of the cities, the Province assists in the payment of expenses for board and lodging. As the enrolment for 1941-42 is 276 compared with 305 for 1940-41, comparatively few pupils were unable to attend one or other of the schools.

The teachers of the day-classes are members of the staff of the Ontario School for the Deaf. As the classrooms, heat and light are provided by the four cities respectively, and as the pupils study in the vocational classes of these cities, the teachers have a responsibility not only to the Superintendent of the Ontario School for the Deaf, but also to the Principals of the schools, where their classes are located.

Recreation

Possibly the greatest loss the children have suffered in moving to Belleville has been in giving up the large playgrounds and assembly room. This has been partly overcome by having the senior girls go to the Y.M.C.A. after school one day a week where one of our teachers acts as instructor. A skating rink was

provided for the boys on the grounds of the senior boys' residence on Blecker Avenue. In addition, the use of the city skating rink was granted on certain days by the owners.

Much of the play equipment, such as slides and swings, has been moved from the former site and placed near the residences now occupied by the children.

The Farm

As the Royal Canadian Air Force did not require the use of the school farm, it has been maintained as formerly to supply milk and eggs for the children.

The Hospital

Hospital beds from the School Hospital were removed to two rooms in one of the rented houses and accommodation was thus provided for ten children. In case of an epidemic, it is possible to use other beds in the same building by transferring healthy children to other residences. Emergency operations are performed at the Belleville City Hospital.

The Teaching Staff

Four teachers resigned at the close of school in June, 1941. Miss Lena Carroll retired on superannuation, having completed forty-one years of teaching, of which twenty-three were devoted to instructing children in the Ontario School for the Deaf. Miss Grace Harris was appointed to the staff of the School for the Deaf in Vancouver, British Columbia, and Miss Mary Hill to the Public School staff, City of Ottawa. Miss Mary Wilkins was married soon after the close of school. As the latter three teachers had just completed their training course, it was a great loss to the school when they left the staff.

The discontinuance of vocational work made necessary the resignations of Miss M. Waite, and Messrs. L. Morrison and T. Truman.

The opening of day-classes in the cities of Toronto, Hamilton, London and Windsor, required the sending of seven of our trained teachers to those centres.

Misses H. Shannon and B. O'Connor were appointed to the staff in September, and began their training as soon as school was opened.

As it was necessary to discontinue part of the work in rhythm, Miss H. Keeler was transferred to classroom work in the junior school.

The death of Mr. Thomas O'Hara in August, came as a great shock to staff and students. Mr. O'Hara had been school carpenter, and instructor in carpentry for many years. He was very successful as a teacher, and very sympathetic in all his contacts with the pupils. By his death, the School lost an efficient teacher, and the Province a faithful public servant.

Report of Dentist

The following work has been completed during the school term:—

Boys: Fillings—(a) Amalgam, 64; (b) Porcelain, 14.

Prophylaxis, 37.

Extractions—(a) Permanent, 7; (b) Deciduous, 36.

Girls: Fillings—(a) Amalgam, 72; (b) Porcelain, 13.

Prophylaxis, 28.

Extractions—(a) Permanent, 7; (b) Deciduous, 34.

Respectfully submitted,

G. C. CALDWELL D.D.S.,

Dentist.

Bursar's Report

In estimating the cost per pupil for 1941-42, it has been difficult to make a satisfactory comparison with the similar cost for 1940-41. The average number of pupils for 1941-42 resident in Belleville, was 236, but the average number of pupils, including the pupils in the day classes in Toronto, Hamilton, London and Windsor, was 283.

Although classrooms for the day-classes are provided by the respective cities, the costs for such items as teachers' salaries, supervision and supplies are paid by the Ontario School for the Deaf. Consequently, in estimating the cost per pupil, all children attending classes in Belleville, Toronto, Hamilton, London and Windsor have been included.

Report of School Physician

The following is a report on the admissions to the Hospital of the Ontario School for the Deaf, Belleville, from April 1st 1941 to March 31st, 1942. There were 109 admissions. One fracture radius and ulna; one operation for mastoiditis; one pneumonia; the remainder were attacks of influenza with minor complications.

All new pupils were vaccinated, immunized against scarlet fever, and received diphtheria toxoid.

R. W. TENNENT,
Physician.

Respectfully submitted,

W. J. MORRISON,
Superintendent.

Belleville, June 9th, 1942.

APPENDIX I

REPORT OF THE SUPERINTENDENT OF THE ONTARIO SCHOOL FOR THE BLIND

War Work

In January Mr. Joseph Hyde, teacher in Grade IV, enlisted in His Majesty's forces. Mrs. Elsie Whittle very capably taught Mr. Hyde's classes during the remainder of the year.

Proceeds from the School Play \$817.00 were donated to the Queen's Fund. The several clubs of the School contributed \$72.71 to war work. Some 200 knitted and sewn articles made by the girls of the School were sent overseas. The School Dance Orchestra supplied music twice a week at the Maple Leaf Active Soldiers' Club, Brantford.

School and Student Honours

At the Stratford Musical Festival held in April the School won the following honours:

Madrigal Choir—First Place—Stratford Beacon Herald Trophy.

Male Chorus—First Place—Pounder Brothers' Trophy.

The Ethel Charlton Memorial Scholarships for general proficiency in the graduating year were awarded Enna Buchkowsky and William Johnson.

Michael Bocian won a first prize in a public speaking contest conducted by CKPC, Brantford.

Louise Cowan, at McMaster University, on an Ontario-School-for-the-Blind scholarship, has successfully completed her third year.

John Green, B.A., won scholarships in two post graduate departments at the Saskatchewan University.

Oliver Bell and George Ennismore graduated from the University of Alberta.

Library Report

The Braille Library consists of about 1,000 volumes, half of these being fiction suitable for senior students. The remainder consists of 150 volumes of juvenile fiction, some scripture, and quite a number of volumes of various reference works. Most of the books have been obtained from Great Britain, but owing to difficulties of transportation, none have been ordered this year. The library has been well patronized, the juveniles especially, being very enthusiastic in regard to their reading.

Medical Report

The usual health services have been given to all students,—annual physical examination, diphtheria toxoid and whooping cough serum to all new students, all necessary dental work, and eye examinations,—these latter two by the school dentist and ophthalmologist.

Number of hospital days.....	445
Number of patients.....	107

Report of Oculist

During the month of October an examination was made of every pupil attending the school.

Condition of Sight of New Entrants	Male	Female	Total
1. Limited vision in both eyes.....	9	7	16
2. Limited vision in one eye.....	1	3	4
3. Quantitative light perception in both eyes.....	1	1	2
4. Quantitative light perception in one eye none in other...	3	2	5
5. Without light perception in both eyes.....	2	1	3
Totals.....	16	14	30

Diseases Causing Blindness among New Entrants	Male	Female	Total
1. Ophthalmia Neonatorum and Keratitis.....	1	1	2
2. Congenital Cataract.....	4	2	6
3. Myopia.....	2	2
4. Optic Atrophy.....	3	4	7
5. Congenital Lesions, Aniridia, Buphthalmus, Nystagmus..	4	3	7
6. Fundus Lesions, Diseases of Retina and Choroid.....	3	2	5
7. Sympathetic Ophthalmia, Plastic Uveitis.....	1	1
Totals.....	16	14	30

In many ways the type of eye lesion noted above compares with that found in former examinations except that congenital cataract has been displaced by two other groups, viz., optic atrophy and congenital conditions such as aniridia, nystagmus and buphthalmus. It is difficult to offer any explanation for this apparent change, especially in the case of optic atrophy which seems to have increased quite beyond the normal limits.

In the class of 1940, there were five cases of myopia, whereas this year there are only two. It would appear perhaps the advent and wide use of vitamins, particularly vitamin A, and calcium have helped to cut down the number of cases of myopia or to prevent the disease from becoming progressive. In like manner one might conclude that the falling off in the number of congenital cataract cases may be attributed to a wider public education, as to pre-natal care and especially as to pre-natal diet.

Throughout the year many pupils were seen for purposes of changing glasses or of treating minor eye troubles. Fortunately there were no eye accidents and generally the year was an excellent one from the point of the "eye health" of the School.

NORMAN W. BRAGG, M.D., F.A.C.S.

Dental Report

All pupils presented themselves for dental examination. The following work was done:

	Boys	Girls
Fillings.....	142	94
Extraction of permanent teeth.....	14	9
Extraction of deciduous teeth.....	20	11
Twenty-three boys and 29 girls required no fillings.		
Thirty-one boys and 15 girls required only one filling.		

J. R. WILL.

		<u>\$21,744.90</u>

ACTUAL EXPENDITURE..... \$70,242.16

I should like to add my appreciation of the good work done by our staff in school, and also in war activities and services, out of school.

All of which is respectfully submitted,

(Signed) H. J. VALLENTYNE,
Superintendent.

Brantford, Ontario, June 30th, 1942.

APPENDIX J

REPORT OF THE ACTING INSPECTOR OF PUBLIC LIBRARIES

To the Honourable Duncan McArthur, M.A., LL.D.

I have the honour to submit the following report of the Public Libraries Branch for the year 1941, including statistics for public libraries in 1940, together with a statement of the Legislative grants paid in 1941. In the absence of the Inspector of Public Libraries, who is on active service, the work of the branch has been carried on under the supervision of the Acting Inspector.

County Libraries

County library associations are increasing in number and influence, and are demonstrating their usefulness to the libraries and schools in ever widening circles. As an instance of this, in the County of Middlesex, 111 school sections out of 182 are receiving school loans, and a quotation from a recently published report covering these schoolroom loans is as follows:

"While we can give figures to show the enormous increase in the circulation of Juvenile books, what we consider most important is that these children are having access to the best literature, and we hope to create a desire for the reading of good books, so that in later years they may become members of their local library."

During 1941 the County of Huron was organized as a county library association, and the smaller libraries in that county are already receiving the benefit of a liberal supply of new books which are sent every three or four months.

Other counties and districts are making enquiry regarding organization methods, and it is hoped that during 1942 there will be a substantial increase in the number of county and district library associations, more especially in the northern and eastern parts of the Province.

Public Libraries of the Province

At present we have 232 free libraries and 269 association libraries in the Province. The sum of \$41,405.10 was paid in Legislative grants; these grants varied from \$2,511.25 to \$5.00. Some of the association libraries did not receive grants through lack of members or other failures to meet the Regulations. Some of the figures, taken from the tables of statistics, are as follows: Amount of Legislative grant paid to the free libraries of the Province, \$29,812.88; amount paid to the association libraries, \$11,592.22.

The Legislative grants paid in 1941 amounted to approximately 3.02 per cent. of the total expenditure on libraries for 1940.

Municipal appropriation to the free public libraries of the Province in 1940 was \$1,170,423.91, and the amount expended on books by the free and association libraries in 1940 was \$269,451.81. The total expenses of the free libraries in 1940 was \$1,289,043.56, and of the association libraries \$54,579.90.

Population served by the free libraries in 1940 was 2,074,848, and by the association libraries 214,013. The total number of borrowers registered in the free and association libraries of the Province was 697,573.

The number of volumes in the free libraries was 2,825,031, and the circulation of them 12,514,929. The association libraries had 663,442 books and the circulation was 893,489, making a total circulation of books in the Province of 13,408,418. The per capita circulation of books in the Province is 3.8.

The Travelling Libraries

The figures regarding the travelling libraries are as follows: Total number of books in the collection 36,854. The number of libraries sent out during 1941 was 1,237, divided as follows: To small public libraries, 265; to schools, 823; to women's institutes, 61, and to study groups, 88. The number of books added to the collection in 1941 was 3,129. A comparison of books circulated during the last three years shows that, in 1939, 112,488 books were sent out, in 1940, 133,465 books, and, in 1941, 142,777.

An increased number of libraries have been visited, meetings with library boards have been held, and under the editorship of the Acting Inspector, the Ontario Library Review and Periodical Index has been issued quarterly as usual.

Change in Status of Libraries

Three association libraries were removed from the list of active libraries. They are East Linton, Delta, and Maxwell.

One county library association was added, that of Huron, and a branch of the Fort William public library, situated at 102 Training Centre, Fort William, has been recognized. In addition to these, representation was made by the President of the Ontario Library Association, on behalf of the small library institutes which gathered at certain intervals, for instruction and assistance in library work. A grant of \$50.00 was given for this object.

The appended statistical tables are for the year 1940, and show the Legislative grants paid in 1941.

I have the honour to be, Sir,

Your obedient servant,

S. B. HERBERT,

Acting Inspector of Public Libraries.

Toronto,
February 18th, 1942.

APPENDIX K

REPORT OF THE PROVINCIAL SUPERVISOR OF MUSIC

During 1941, Music has continued to spread throughout the schools of the Province. Statistics attached to this Report show that on June 30th, 12,327 or 71.8% of the Public and Separate School classrooms were receiving regular Music instruction under the supervision of qualified teachers. This represents a slight increase over last year. In the remainder of the schools, although not under the direction of qualified Music teachers, some singing is carried on. Three hundred and twenty-one Collegiate Institutes, High Schools and Continuation Schools provided a course in Music, an increase of 29 over last year. In addition, 13 Vocational Schools, not included in the above summary, are teaching Music.

Eight Music Films from the Departmental Library of 16 mm. sound films were presented to 47,538 children and 6,172 adults. Approximately 120 Music Festivals and Combined Concerts were held in 1941. During the year the following literature was prepared and distributed to Music teachers—

Training the Voices of Children and Adolescents.
Introducing Part Singing with Adolescent Boys.

The Department gave active support to the Ontario Educational Association in presenting a Concert at Varsity Arena on the Wednesday of Easter week. More than 1,500 children from over 100 schools in Ontario performed for an audience of 6,000 and the net proceeds, \$850.00, were used for War Charities.

Statistics.—The following statistical information concerns the school year ending June 30th, 1941, and includes all schools providing a course in Music under properly certificated Music teachers.

Respectfully submitted,

G. R. FENWICK,
Provincial Supervisor of Music.

Toronto, March 2nd, 1942.

APPENDIX L

REPORT OF THE REGISTRAR OF TRADE SCHOOLS

TO THE HONOURABLE DR. DUNCAN MCARTHUR,
Minister of Education, Province of Ontario.

DEAR SIR:

I beg leave to present to you the report of the operations of the Trade-Schools Regulation Act for the year 1941.

The continuance of the war, with its consequent increasing demands on the labour market, its ever increasing absorption of young men and women into various branches of military service, and its restrictions on the purchase of materials which are being conserved for war purposes, is, in many cases, curtailing the operation of trade schools. The consequent reduction in registration does not apply so markedly to schools conducting work by correspondence. In many cases these schools find the applications increasing, as such work may proceed whether the person is employed in industry or is serving in some military capacity. Many of the young men in the services are looking forward to the time when hostilities cease and they return to civil life. By taking advantage, as time affords, to improve their standing by means of various correspondence engineering courses, they hope to be in a better position to re-enter civilian life. Military organizations are encouraging such procedure and some of the trade schools are offering special reduced rates to such applicants and report increased registrations. Schools giving courses which are not deemed essential to the promotion of the war effort are experiencing difficulties in maintaining an adequate registration to ensure the continuance of operations. Some such schools have had to withdraw from the field during the year.

The advice of this Department continues to be extensively sought for vocational guidance, both by direct conference and by correspondence, regarding suitable courses in which to register and opportunities available upon the completion of such courses. Information is also sought as to the reliability of schools with which they are contemplating registration. Appreciation has been expressed regarding the value of these services.

The promotion, by specialized schools, of new courses based on changed conditions resulting from war restrictions, similar to that which has had to be curbed in the past, is now in evidence. Such types of promotion work are not allowed to reach the proportions which existed previous to the passing of the Trade Schools Regulation Act. From time to time such courses will have to be added, by Order in Council, to those now coming under the Act. Some of these new courses have no operations involved which differ from courses now in existence. The difference is simply one of name, and material used, rather than one of new instruction matter.

Some of the Trade Schools are rendering an important service in assisting the war effort. Thousands have been trained to enter war industries and war services without any cost to the government whatsoever. The presence of women taking such courses is a new experience and is working out very satisfactorily. Women have proved their ability to fit into occupations which previously were confined to men. Large numbers of women are being trained in sponsored classes such as those for wireless radio operators to be placed in air transport position.

This Department was recently successful in arranging for the continuation of the courses of instruction being given to students by one Radio School, which desired to suspend operations. Arrangements were made with another Radio School which was willing to enroll the students affected, in its existing classes without any interference with the obligations assumed by these students through their original contracts.

A close check is made of all advertising material of the schools before it is permitted to be published. In this way it is possible to avoid misrepresentation to those interested in taking the courses advertised. In this factor of control we have had the fullest co-operation of the press and the publishers.

Where the enlistment of young men and women in the armed forces interferes with the continuity or continuance of courses of instruction for which they have registered, the schools concerned are ready and willing to make suitable adjustment.

Valuable assistance has been given to the Foreign Exchange Control Board in settling problems arising out of applications to permit courses to be taken in schools situated in the United States and elsewhere. Where similar courses can be obtained in Canada such requests are refused.

Assistance is also given to other government departments which may be concerned with Trade Schools, to other Provinces and States to assist them in organizing similar control to that operating in Ontario and to Better Business Bureaus from various centres in Canada and the United States which seek information regarding cases requiring investigation or adjustment. The Toronto Better Business Bureau refers all such cases of complaint to this Department for settlement.

We are pleased to report the fullest co-operation of the management of practically all registered trade schools in maintaining the high ethical standard which the Trade Schools Regulation Act was intended to develop. It is also noted that the public are freely seeking information and guidance and showing appreciation of the services rendered.

W. S. KIRKLAND,
Registrar for Trade Schools.

Toronto, October 5th, 1942.

PART II

STATISTICS

of

The Provincially-Controlled
Schools of Ontario

TERMINOLOGY

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relation of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

Correspondence Courses—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 80% of these pupils live in Northern Ontario, and half of them are of foreign parentage. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

Enrolment—The number recorded on the school register as in active attendance. The school census for the Province is now taken annually on the last school day in May.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—Is a subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

(a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.

(b) **R.C. Separate**—For the children of Roman Catholics.

(c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

1. **Collegiate Institutes.**

2. **High Schools.**

3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

1. **Technical High School.**

2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of Northern Ontario. There are 7 of these cars at present each with a definite route of about 175 miles, which is covered in a month or six weeks. Each stop is from 4 to 6 days. Problems are solved, work is outlined and assigned. Parent, come to night classes, where English, spelling, writing and arithmetic are taught them, and where daily problems of life are discussed. Ninety per cent of the pupils are non-English speaking. The Department supplies all school needs free. The enrolment is about 275.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

Secondary School District—Is the area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In the territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

A In all Provincially Controlled Schools.

B Commencing with 1929-30 the enrolment is that of the last school day in May. The former figures, covering the entire calendar year, contain a percentage of duplication.

C Covers the school year.

D This includes the following: Manual Training, Household Science, Auxiliary, Kindergarten, Art, Music, Physical Culture.

E This includes Third Class, District, Permanent Ungraded, and Temporary.

F Included with Public Schools.

A Includes extra-mural Students.

B 52 of these previously held District Certificates.

C Located at Hamilton, London, North Bay, Ottawa, Peterborough, Stratford and Toronto.

D Discontinued.

VII. DEPARTMENTAL SUMMER COURSES ENROLMENT BY SUBJECTS IN RECENT YEARS

(The Summer Courses are conducted by the Department of Education for the benefit of Teachers, who desire to spend a part of their summer vacation in an effort to improve their academic and professional standing, and thus to become more efficient in carrying on with a modernized curriculum.)

In the interests of economy summer courses have been discontinued for the duration of the war. See 1940 Report for enrolment in recent years.

VIII. TREND IN GRADE OF CERTIFICATES OF FRENCH-SPEAKING TEACHERS IN ENGLISH-FRENCH SCHOOLS

SOURCES OF ELEMENTARY TEACHER SUPPLY, 1908-1942

SOURCES OF ELEMENTARY TEACHER SUPPLY, 1908-1942

In 1908 the system of teacher-training in Ontario underwent radical modification. County Model Schools were closed and the issuance of Third Class certificates (save in Provincial Model Schools) was discontinued. Prospective teachers were required to obtain at least Middle School standing and to secure at least a Second Class certificate through attending Normal School for one year.

The following seven years was a period of readjustment. Attendance at the newly instituted Interim Second Class course at Normal Schools did not increase according to expectations. More than one-third of those enrolled were teachers who had temporarily left the profession to proceed to permanent certificates. To meet the resulting shortage in the supply of teachers many temporary certificates were issued (largely to teachers holding expired Third Class certificates) and summer training schools leading to provisional certificates were opened.

In the year 1915-16 in response to a demand for teachers there was a marked increase in attendance at Normal Schools. The trend toward increased enrolments which this movement might in normal times be taken to portend was, however, cut short the following years because of enlistment, conscription and opportunities for war employment. In 1939-40 a similar movement in the direction of increased attendance was likewise rendered abortive because of war emergencies.

Between the years 1916-24, 1927-32, 1937-42 there was a scarcity of teachers as evidenced by the larger issuance of temporary certificates and district certificates from summer Model Schools, by increases in salaries paid to rural school teachers and likewise as a matter of historic record. During the two intervening periods 1924-27, 1932-37 there was a surplus of teachers.

Consideration of the peaks and valleys of the graph on the opposite page would seem to imply that an average annual attendance of 1,500 at the Normal Schools is needed to balance withdrawals from the profession. Making allowance for candidates who fail and for graduates who never enter teaching, an attendance of 1,500 would provide in the neighbourhood of 1,400 active qualified teachers.

It is noted that the valleys 1916-21 and 1927-30 were relatively sharp but that the present valley is broad and threatens to become broader. During the period 1935-42 there has been a total decrease in attendance at Normal School of 2,614 from the 1,500 level. To this must be added a decrease of 500 in the Normal School attendance of 1942-43. During the year 1939-40, 1,662 teachers in elementary schools withdrew from the profession, in the year 1940-41, 1,747, in the year 1941-42, 1,855. Over 2,000 married teachers and teachers from other occupations have re-entered the profession for the time-being while the number of temporary certificates being granted to unqualified teachers is on the increase. On the other hand since 1934 there has been a decline of some 30,000 in the elementary school population and 347 small rural schools have been closed.

The above data invite consideration to two problems:

- (1) At the conclusion of the war will the number of teachers returning from war services or war industry be sufficient to replace the number of married and otherwise temporarily employed teachers who retire, or in view of the present cumulative deficiency of 3,100 Normal School attendants (2,300 active teachers) will there occur an acute shortage of teachers followed by emergency measures to supply teachers and an abnormal peak in Normal School attendance?
- (2) Would it be feasible to consider a sliding scale of requirements for entry to Normal School in order that abnormal peaks and valleys in attendance, and consequent violent fluctuations in the demand and supply of teachers might be levelled off?

*Special certificates are listed only where teacher devotes whole time to that subject.

†Music Teachers—Excludes many regular classroom teachers who also teach music. In cities and towns only full-time teachers are indicated. All part-time and itinerant teachers are classified according to county of domicile, and, since they may teach in both Public and Separate schools, no distinction is made.

Drumbo Continuation School after beautification of grounds.

Courtesy Canadian School Journal

Port Perry High School

For 26 years this school has specialized in Agricultural training and Home Economics. Twenty-five percent of the instruction in the first two years is devoted to these sources. Both boys and girls are trained to meet the problems of rural life, with the result that the majority make agriculture their vocation.

SUMMARY

(This includes results of candidates from private sources)

Enrolment Grade VIII on the last school day in May, 1941.....	57,801
Number of High School Entrance Candidates:—	
Recommended by Principal on Group II.....	33,780
Number taking written test on Group II.....	21,475
High School Entrance candidate percentage of 1941 Grade VIII Enrolment.....	55.255 95.60%

INATION RESULTS BY INSPECTORATES, 1941

Successful Candidates

Courtesy Ontario Department of Health

The Ontario Government Dental Car

This car was provided by the joint efforts of the C.P.R., the Rosedale chapter of the I.O.D.E. (Toronto), and the Ontario Department of Health. It operates between Sudbury and the Manitoba border, a district where dental services are otherwise unavailable.

The service rendered covers forty-four school districts, and approximately 1,200 school children have received free dental treatment. The car is maintained by the Ontario Department of Health.

The upward trend in teachers' salaries between the school years 1940-41 and 1941-42 is most evident within the lowest paid group of rural teachers. In 1940-41 the predominating rural salary was \$700. In 1941-42 it had risen to \$800. 1,736 teachers drew this figure, which is equivalent to \$15.38 per week for a 52-week year.

**TABLE 19—RELATION OF TOWNSHIP AREAS AND CONSOLIDATIONS
TO RURAL SCHOOL SECTIONS**

Gross number of sections includes those with no schools or closed schools and those now in consolidations or township areas. Union sections are counted as one section. Those in union with an urban centre are omitted except in the case of consolidations. Sections not operating schools includes those with no school and those with closed schools.

County	Gross Number of Sections *	Sections not Operating Schools *	Sections Operating Schools *	Consolidations		Township Areas

*As at November, 1941.

†In each case, one consolidation of 3 sections is now in a township area.

‡When an area is formed the individual sections are dissolved, hence 666 sections have been dissolved and are now combined into 130 administrative units.

The Navigation Schools had enrolments as follows: Collingwood (35), Kingston (4).

Type of school:—ACT —Composite (academic, commercial and technical).

AC —Combined academic and commercial.

CT —Combined commercial and technical.

A.AGR.—Combined academic and agriculture.

COM.—Commercial.

T —Technical.

N —Navigation.

AM —Academic, and Mining School.

TABLE 38—NIGHT SCHOOLS—Classification of Students by Subjects of Study, 1941-42

I. ACADEMIC

A—CULTURAL

1. English for New Canadians.....	260	7. French.....	230
2. Reading.....	362	8. Spanish.....	15
3. Literature.....	265	9. Music Appreciation.....	24
4. Composition and Spelling.....	490	10. Music.....	23
5. Grammar.....	429	11. Voice Production.....	26
6. Public Speaking.....	128		

B—PRACTICAL

1. General Mathematics.....	155	5. Trigonometry.....	197
2. Arithmetic.....	637	6. Mensuration.....	87
3. Algebra.....	367	7. Shop Mathematics.....	1,091
4. Geometry.....	364		

II. VOCATIONAL AND INDUSTRIAL

A—DOMESTIC ARTS

1. Cooking.....	1,436	7. Sewing and Dressmaking.....	3,636
2. Hygiene and Dietetics.....	189	8. Millinery.....	129
3. Home Nursing.....	299	9. Textiles.....	26
4. Home Economics.....	156	10. Embroidery and Lace Making.....	23
5. Household Accessories.....	17	11. Knitting.....	9
6. Children's Clothing.....	17	12. Period Furniture.....	24

B—COMMERCE

1. Stenography.....	4,377	9. Filing.....	55
2. Typewriting.....	5,754	10. Office Routine.....	82
3. Business English.....	62	11. Book-keeping.....	1,569
4. Journalism.....	55	12. Advertising.....	43
5. Rapid Calculation.....	42	13. Salesmanship.....	56
6. Commercial Arithmetic.....	7	14. Commercial Law.....	19
7. Business Machines.....	683	15. Dictaphone Transcription.....	173
8. Business Forms.....	174		

C—ART, DRAFTING AND DESIGN

(a) Pure Art:		5. Anatomy.....	60
1. History of Art.....	12	6. Life Drawing.....	290
2. Elementary Art.....	44	7. Modelling.....	26
3. Colour Study.....	246	8. Perspective.....	63
4. Still Life Drawing.....	88	9. Antique Drawing.....	23
(b) Applied Art:		3. Interior Decorating.....	122
1. Illustrating.....	145	4. Costume Drawing and Design.....	166
2. Commercial Art and Design.....	177	5. Photography.....	21
(c) Industrial Drafting and Design:		5. Electrical Drawing.....	10
1. Mechanical Drawing.....	1,913	6. Machine Drawing and Design.....	516
2. Industrial Design.....	239	7. Tool Design.....	24
3. Blue Print Reading.....	174	8. Sheet Metal Drawing.....	121
4. Architectural Drawing.....	300	9. Horological Drafting.....	29

D—CRAFTS

1. Leather Working.....	78	6. Art Metal Work.....	17
2. Wood Carving.....	16	7. Printing.....	66
3. Cabinet Making.....	189	8. Pattern Making.....	41
4. Pottery.....	47	9. Watchmaking.....	31
5. Rugs.....	24		

E—SCIENCE AND ENGINEERING

(a) Science:		5. Metallurgy and Assaying.....	25
1. Chemistry.....	261	6. Applied Mechanics.....	14
2. Industrial Chemistry.....	210	7. Electricity.....	639
3. Chemistry for Nurses.....	117	8. Photography.....	50
4. Physics.....	31		
(b) Engineering:		5. Telephony.....	63
1. Stationary.....	307	6. Telegraphy.....	21
2. Refrigeration and Air Conditioning.....	39	7. Wireless.....	63
3. Aviation.....	23		
4. Milling (Minerals).....	8		

F—TRADES AND INDUSTRY

1. General Woodworking.....	645	10. Armature Winding.....	15
2. Carpentry and Building.....	300	11. Radio Construction and Repair.....	295
3. Machine Shop Work.....	2,534	12. Glove Making.....	48
4. Power Operating.....	59	13. Hair Dressing.....	82
5. Acetylene Welding.....	1,028	14. Sheet Metal Work.....	248
6. Electric Welding.....	125	15. Plumbing.....	30
7. Arc and Acetylene Welding.....	456	16. Forge Work.....	19
8. Electric Wiring.....	419	17. Bench Fitting.....	55
9. Auto Mechanics.....	1,153	18. Ship Fitting.....	19

G—WAR WORK STUDIES

1. Aircraft Construction.....	527	3. Munition Part Inspection.....	97
2. R.C.A.F. Course.....	215		

III. MISCELLANEOUS

1. First Aid.....	174	4. Gymnasium.....	372
2. Lip Reading.....	62	5. Swimming.....	372
3. Vocational Guidance.....	38
